Algorithmic Trading Johannes Gomolka, 2011 Die Elektronisierung der Finanzmärkte ist in den letzten Jahren weit vorangeschritten Praktisch jede Börse verfügt über ein elektronisches Handelssystem In diesem Kontext beschreibt der Begriff Algorithmic Trading ein Phänomen bei dem Computerprogramme den Menschen im Wertpapierhandel ersetzen Sie helfen dabei

Investmententscheidungen zu treffen oder Transaktionen durchzuführen Algorithmic Trading selbst ist dabei nur eine unter vielen Innovationen welche die Entwicklung des Börsenhandels geprägt haben Hier sind z.B. die Erfindung der Telegraphie des Telefons des FAX oder der elektronische Wertpapierabwicklung zu nennen Die Frage ist heute nicht mehr ob Computerprogramme im Börsenhandel eingesetzt werden Sondern die Frage ist wo die Grenze zwischen vollautomatischem Börsenhandel durch Computer und manuellem Börsenhandel von Menschen verläuft Bei der Erforschung von Algorithmic Trading wird die Wissenschaft mit dem Problem konfrontiert dass keinerlei Informationen über diese Computerprogramme zugänglich sind Die Idee dieser Dissertation bestand darin dieses Problem zu umgehen und Informationen über Algorithmic Trading indirekt aus der Analyse von Fonds Renditen zu extrahieren Johannes Gomolka untersucht daher die Forschungsfrage ob sich Aussagen über computergesteuerten Wertpapierhandel kurz Algorithmic Trading aus der Analyse von Fonds Renditen ziehen lassen Zur Beantwortung dieser Forschungsfrage formuliert der Autor eine neue Definition von Algorithmic Trading und unterscheidet mit Buy Side und Sell Side Algorithmic Trading zwei grundlegende Funktionen der Computerprogramme die Entscheidungs- und die Transaktionsunterstützung Für seine empirische Untersuchung greift Gomolka auf das Multifaktorenmodell zur Style Analyse von Fung und Hsieh 1997 zurück Mit Hilfe dieses Modells ist es möglich die Zeitreihen von Fondsrenditen in interpretierbare Grundbestandteile zu zerlegen und den einzelnen Regressionsfaktoren eine inhaltliche Bedeutung zuzuordnen Die Ergebnisse dieser Dissertation zeigen dass man mit Hilfe der Style Analyse Aussagen über Algorithmic Trading aus der Analyse von Fonds Renditen machen kann Die Aussagen sind jedoch keiner technischen Natur sondern auf die Analyse von Handelsstrategien Investment Styles begrenzt
