areal and genetic context being informed by linguistic typology and theory yet at the same time remaining data driven and theory neutral in the way generalisations are stated Against the Australian and a broader cross linguistic background Kunbarlang possesses remarkable features at all levels of its organisation *Atlas of the World's Languages* R.E. Asher, Christopher Moseley, 2018-04-19 Before the first appearance of the Atlas of the World's Languages in 1993 all the world's languages had never been accurately and completely mapped The Atlas depicts the location of every known living language including languages on the point of extinction This fully revised edition of the Atlas offers up to date research some from fieldwork in early 2006 a general linguistic history of each section an overview of the genetic relations of the languages in each section statistical and sociolinguistic information a large number of new or completely updated maps further reading and a bibliography for each section a cross referenced language index of over 6 000 languages Presenting contributions from international scholars covering over 6 000 languages and containing over 150 full colour maps the Atlas of the World's Languages is the definitive reference resource for every linguistic and reference library *The Anatomy of Avoidance* R. M. W. Dixon, 2025-05-19 Speakers of Dyirbal in North Queensland Australia have an everyday language style which has been well described They also have an avoidance style called Jalnguy which must be used in the presence of certain tabooed kin such as the mother in law Jalnguy has the same grammar and phonology as the everyday style but the vocabularies are entirely different Jalnguy has only about one sixth as many lexemes as the everyday style with various techniques used to create a Jalnguy correspondent for each everyday style word The underlying semantic system of Dyirbal is thus realised at two levels of generality and is revealed through detailed study of the correspondences between them This monograph is the first comprehensive study of this in law avoidance language providing fascinating new insights into register variation and the complexities of kinship in Australian languages **Language Isolates** Lyle Campbell, 2017-10-03 Language Isolates explores this fascinating group of languages that surprisingly comprise a third of the world's languages Individual chapters written by experts on these languages examine the world's major language isolates and language isolates by geographic regions with up to date descriptions of many including previously unrecorded language isolates Each language isolate represents a unique lineage and a unique window on what is possible in human language making this an essential volume for anyone interested in understanding the diversity of languages and the very nature of human language Language Isolates is key reading for professionals and students in linguistics and anthropology *Pacific Languages* John Lynch, 2016-06-01 Almost one quarter of the world's languages are or were spoken in the Pacific making it linguistically the most complex region in the world Although numerous technical books on groups of Pacific or Australian languages have been published and descriptions of individual languages are available until now there has been no single book that attempts a wide regional coverage for a general audience Pacific Languages introduces readers to the grammatical features of Oceanic Papuan and Australian languages as well as to the semantic structures of these languages For readers without a formal linguistic

background a brief introduction to descriptive linguistics is provided In addition to describing the structure of Pacific languages this volume places them in their historical and geographical context discusses the linguistic evidence for the settlement of the Pacific and speculates on the reason for the region s many languages It devotes considerable attention to the effects of contact between speakers of different languages and to the development of pidgin and creole languages in the Pacific Throughout technical language is kept to a minimum without oversimplifying the concepts or the issues involved A glossary of technical terms maps and diagrams help identify a language geographically or genetically reading lists and a language index guide the researcher interested in a particular language or group to other sources of information Here at last is a clear and straightforward overview of Pacific languages for linguists and anyone interested in the history of sociology of the Pacific

W. Dixon, 2015 This book builds on R M W Dixon's most influential work on the languages of North Queensland It brings together studies in the fields of phonology syntax language contact and language attrition illustrated with examples of the unusual and theoretically significant features of the languages studied Language Typology and Language Universals Martin Haspelmath, 2001 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors

plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume
