Computational Intelligence based Optimization of Manufacturing Process for Sustainable Materials Deepak Sinwar, Kamalakanta Muduli, Vijaypal Singh Dhaka, Vijander Singh, 2023-09-25 The text comprehensively discusses computational models including artificial neural networks agent based models and decision field theory for reliability engineering It will serve as an ideal reference text for graduate students and academic researchers in the fields of industrial engineering manufacturing engineering computer engineering and materials science Discusses the development of sustainable materials using metaheuristic approaches Covers computational models such as agent based models ontology and decision field theory for reliability engineering Presents swarm intelligence methods such as ant colony optimization particle swarm optimization and grey wolf optimization for solving the manufacturing process Include case studies for industrial optimizations Explores the use of computational optimization for reliability and maintainability theory The text covers swarm intelligence techniques including ant colony optimization particle swarm optimization cuckoo search and genetic algorithms for solving complex industrial problems of the manufacturing industry as well as predicting reliability maintainability and availability of several industrial components

Engineering Design Gerhard Pahl, Wolfgang Beitz, 2013-11-11 The aim of the first two German editions of our book Kon struktionslehre Engineering Design was to present a comprehensive consistent and clear approach to systematic engineering design The book has been translated into five languages making it a standard international reference of equal importance for improving the design methods of practising designers in industry and for educating students of mechanical engineering design Although the third German edition conveys essentially the same message it contains additional knowledge based on further findings from design research and from the application of systematic design methods in practice The latest references have also been included With these additions the book achieves all our aims and represents the state of the art Substantial sections remain identical to the previous editions The main extensions include a discussion of cognitive psychology which enhances the creativity of design work enhanced methods for product planning principles of design for recycling examples of well known machine elements special methods for quality assurance and an up to date treatment of CAD
Optimizing Virtual Reality and Metaverse for Remote Work and Virtual Team Collaboration Bansal, Rohit, Lampou, Rania, 2024-09-13 Leveraging virtual reality VR and the metaverse for remote working and virtual team collaboration presents innovative opportunities to create immersive interconnected digital environments where remote teams can collaborate communicate and work together effectively VR platforms within the metaverse offer advanced

communication and collaboration tools enabling natural and intuitive interactions among remote team members By leveraging the capabilities of VR and the metaverse organizations can create dynamic immersive and interconnected virtual work environments that transcend traditional boundaries enabling remote teams to collaborate effectively innovate creatively and thrive in the digital age Optimizing Virtual Reality and Metaverse for Remote Work and Virtual Team Collaboration provides deep insights into the role and applications of VR and metaverse in effective remote working and virtual team collaboration It further discusses the implementation and implications of these tools in modern work environments Covering topics such as business communication negotiation techniques and workplace training this book is an excellent resource for academicians graduate and postgraduate students educators researchers industry professionals business leaders and more

Federal Register, 2003-12 **Atomic Structure and Lifetimes** Lorenzo J. Curtis, 2003-10-30 This book presents a new approach to introductory graduate courses on atomic structure The author's approach utilizes conceptually powerful

semiclassical modeling methods and demonstrates the degree to which the Maslov indexed EBK quantization elucidates the quantum mechanical formulation of level energies and lifetimes It merges this with an update and extension of semiempirical data systematizations developed by Bengt Edl n to describe complex atoms and adapts them to include the specification of lifetimes The text emphasizes the historical basis of the nomenclature and methodologies of spectroscopy However interaction mechanisms are presented deductively based on quantum mechanical and field theoretical models rather than tracing their indirect paths of discovery Many worked examples provide applications to areas such as astrophysics hyperfine structure and coherent anisotropic excitation The book presents a firm foundation for specialists in atomic physics as well as a capstone application for specialists in astrophysics chemistry condensed matter and other related fields **Fuzzy**

Logic-based Material Selection And Synthesis Mustafa B Babanli,2019-03-04 This unique compendium presents a comprehensive and self contained theory of material development under imperfect information and its applications The book describes new approaches to synthesis and selection of materials with desirable characteristics Such approaches provide the ability of systematic and computationally effective analysis in order to predict composition structure and related properties of new materials The volume will be a useful advanced textbook for graduate students It is also suitable for academicians and practitioners who wish to have fundamental models in new material synthesis and selection **Shipping Innovation N.**

Wijnolst,Tor Wergeland,Kai Levander,2009 There were not many textbooks on shipping available for the students in the early 1990s Therefore it was decided to write Shipping in 1996 One year earlier Niko Wijnolst had published Design Innovation in Shipping based on work at the Delft University of Technology The two books together offered a comprehensive insight and overview into the dynamics of global shipping and maritime innovation Although the core of the books held its value it was decided to make an update of the two books and merge them into one new textbook Shipping Innovation destined for a broad spectre of maritime students and professionals Some substantial new parts were added as well as some new contributions by other writers This textbook offers a one stop shopping experience to those students and professionals who wish to get acquainted with the multifaceted aspects of global shipping and its everlasting innovation dynamics Some of the new contributions are the mission based design process of a Panamax containership and a ro ro vessel sustainable shipping and innovation and an innovation case study on the revolutionary design of a ballast free ship Shipping Innovation is a remarkable book It deserves to become a standard text for students and professionals alike combining as it does both commercial and technical topics into one coherent whole Paul Gunton Fairplay co uk *California.
