Alone With The Creative Imagination In Sufism Of Ibn Arabi Henry Corbin:

Alone with the Alone Henry Corbin, 1998 Ibn Arabi was one of the great mystics of all time Through the richness of his personal experience and the constructive power of his intellect he made a unique contribution to Shi'ite Sufism In this book which features a powerful new preface by Harold Bloom Henry Corbin brings us to the very core of this movement with a penetrating analysis of Ibn Arabi's life and doctrines

Alone with the Alone Henry Corbin, 1998 *Rethinking Ibn 'Arabi* Gregory A. Lipton, 2018-04-02 The thirteenth century mystic Ibn Arabi was the foremost Sufi theorist of the premodern era For more than a century Western scholars and esotericists have heralded his universalism arguing that he saw all contemporaneous religions as equally valid In *Rethinking Ibn Arabi* Gregory Lipton calls this image into question and throws into relief how Ibn Arabi's discourse is inseparably intertwined with the absolutist vision of his own religious milieu that is the triumphant claim that Islam fulfilled superseded and therefore abrogated all previous revealed religions Lipton juxtaposes Ibn Arabi's absolutist conception with the later reception of his ideas exploring how they have been read appropriated and universalized within the reigning interpretive field of Perennial Philosophy in the study of Sufism The contours that surface through this comparative analysis trace the discursive practices that inform Ibn Arabi's Western reception back to the eighteenth and nineteenth century study of authentic religion where European ethno-racial superiority was wielded against the Semitic Other both Jewish and Muslim Lipton argues that supersessionist models of exclusivism are buried under contemporary Western constructions of religious authenticity in ways that ironically mirror Ibn Arabi's medieval absolutism

Beshara and Ibn 'Arabi Suha Taji-Farouki, 2007-11-01 Investigating Sufi inspired spirituality in the modern world this multi-faceted and interdisciplinary volume focuses on Beshara a spiritual movement that applies the teachings of Ibn Arabi in a non-Muslim context It traces the movement's emergence in sixties Britain and analyses its major teachings and practices exploring through this case study the interface between Sufism and the New Age and the encounter between Islam and the West Examining from a global perspective the impact of cultural transformations associated with modernization and globalization on religion this timely volume concludes by tracing possible futures of Sufi spirituality both in the West and in the Muslim world

Ibn 'Arabi's Mystical Poetics Denis Enrico McAuley, 2012-08-23 The first full length monograph devoted to the Diwan collected poems of Muhyi'l-Din Ibn Arabi 1165-1240 a hugely influential figure in the development of Sufism

Sufism and Zen in the West Saeko Yazaki, Michael Conway, 2025-02-20 Historically and culturally Sufism and Zen may not seem to have anything in common However in the West their spiritual messages are often perceived as strikingly similar In this book scholars analyse the ways in which Sufism and Zen were introduced to and developed in the West The collection shows that the popularity of these religions arose not because of the substantive shared elements within the two traditions but because their promoters in the West employed similar strategies to respond to the interests of a modern Western audience The first book to make a close comparison of Sufism and Zen this study is an

important contribution to understanding Western religious life and processes of easternisation It sheds new light on how Sufism and Zen came to represent a spirituality that is both countercultural and in touch with modern sensitivities Jung's Red Book for Our Time Murray Stein ,Thomas Arzt,2021-09-25 The spiritual malaise regnant in today s disenchanted world presents a picture of a polar night of icy darkness as Max Weber wrote already a century ago This collective dark night of the soul is driven by climate change related disasters rapid technological innovations and opaque geostrategic realignments In the wake of what policy analysts refer to as Westlessness the post modern age is characterized by incessant distractions urgent calls to responsibility and in humanly short deadlines which result in a general state of exhaustion and burnout The hovering sense of living in a time frame that is post histoire induces states of confusion on a personal level as well as in the realm of politics Totally missing is a grand narrative to guide humanity s vision in the midst of a world crisis Thinkers scholars and Jungian analysts are increasingly looking to C G Jung s monumental oeuvre The Red Book as a source for guidance to re-enchant the world and to find a new and deeper understanding of the homo religiosus The essays in this series on Jung s Red Book for Our Time Searching for Soul under Postmodern Conditions circle around this objective and offer countless points of entry into this inspiring work **Innovation in Esotericism from the Renaissance to the**

Present Georgiana D. Hedesan,Tim Rudbøg,2021-05-10 This collection explores the role of innovation in understanding the history of esotericism It illustrates how innovation is a mechanism of negotiation whereby an idea is either produced against or adapted from an older set of concepts in order to respond to a present context Featuring contributions from distinguished scholars of esotericism it covers many different fields and themes including magic alchemy Rosicrucianism Theosophy Tarot apocalypticism and eschatology Mesmerism occultism prophecy and mysticism **Ariadne's Clue** Anthony

Stevens,2001-04-22 Symbolism is the most powerful and ancient means of communication available to humankind For centuries people have expressed their preoccupations and concerns through symbolism in the form of myths stories religions and dreams The meaning of symbols has long been debated among philosophers antiquarians theologians and more recently anthropologists and psychologists In Ariadne s Clue distinguished analyst and psychiatrist Anthony Stevens explores the nature of symbols and explains how and why we create the symbols we do The book is divided into two parts an interpretive section that concerns symbols in general and a dictionary that lists hundreds of symbols and explains their origins their resemblances to other symbols and the belief systems behind them In the first section Stevens takes the ideas of C G Jung a stage further asserting not only that we possess an innate symbol forming propensity that exists as a creative and integral part of our psychic make up but also that the human mind evolved this capacity as a result of selection pressures encountered by our species in the course of its evolutionary history Stevens argues that symbol formation has an adaptive function it promotes our grasp on reality and in dreams often corrects deficient modes of psychological functioning In the second section Stevens examines symbols under four headings The Physical Environment Culture and Psyche People Animals

and Plants and The Body Many of the symbols are illustrated in the book's rich variety of woodcuts From the ancient symbol of the serpent to the archetypal masculine and feminine from the earth to the stars from the primordial landscape of the savannah to the mysterious depths of the sea Stevens traces a host of common symbols back through time to reveal their psychodynamic functioning and looks at their deep rooted effects on the lives of modern men women and children

[Wetiko](#) Paul Levy, 2023-05-23 Transform wetiko into its own antidote Learn how ancestral trauma is at the root of wetiko and how the wounded healer shaman archetype can help bring both individual and collective healing Meet the inner guide a daemon angel that lives within us as an ally in our encounters with the daemonic energy of wetiko Cultivate symbolic awareness as a path to creating meaning and transmute the poison of wetiko into medicine for healing The profound and radical Native American idea of wetiko a virus of the mind underlies the collective insanity and evil that is destructively playing out around the world Yet as Paul Levy reveals in depth encoded within wetiko itself lies the very medicine needed to combat the mindvirus and heal both ourselves and our world Levy begins by investigating how the process of becoming triggered wounded or falling into suffering can help us better understand the workings of wetiko in a way that transforms our struggles into opportunities for awakening He reveals the source of wetiko unhealed multigenerational ancestral trauma

which is acted out and propagated through the family He highlights one of the primary archetypes currently activated in the collective unconscious of humanity the wounded healer shaman and shows how recognizing this archetype can help us as we navigate a collective descent into the underworld of the unconscious a true bardo realm between our past and future worlds Drawing on the work of C G Jung Rudolf Steiner Henry Corbin Wilhelm Reich and Nicolas Berdyaev the author introduces the inner guide a daemon angel that lives within us as an ally in our encounters with the daemonic energy of wetiko He explores how to cultivate symbolic awareness interpreting events in our lives symbolically like a dream as a path to creating meaning which alchemically transmutes the poison of wetiko into medicine for healing the psyche Ultimately the author reveals that the best protection and medicine for wetiko is to connect with the light of our true nature by becoming who we truly are

The Single Monad Model of the Cosmos Mohamed Haj Yousef,2014-06-27 Ibn Arabi is the only scholar who was able to formulate a unique cosmological model that is capable of explaining our observations as well as many phenomena in physics and cosmology and even solve some perplexing modern and historical riddles in science and philosophy such as the EPR paradox and Zeno paradoxes of motion Moreover the Single Monad Model explains for the first time in history the importance of the week as a basic unit of space and time together This prodigious theory is based on the notion of the intertwining days where Ibn Arabi shows that at every instance of time there is indeed one full week of creation that takes place in the globe Since its publication in 2008 this book has triggered an overwhelming response and I hope this expanded edition will help promote further Ibn Arabi s wisdom that is still buried in his multitudes of books and treatises Ibn Arab is one of the most prominent figures in Islamic history especially in relation to Sufism and Islamic philosophy and theology In this book we want to explore his cosmology and in particular his view of time in that cosmological context comparing his approaches to the relevant conclusions and principles of modern physics whenever possible We shall see that Ibn Arab had a unique and comprehensive view of time which has never been discussed by any other philosopher or scientist before or even after Ibn Arab In the final two chapters we shall discuss some of the ways his novel view of time and cosmology may be used to build a complete model of the cosmos that may deepen and extend our understanding of the world while potentially solving some of the drawbacks and paradoxes in the current cosmological models of modern physics As we discuss in the opening chapter there is no doubt that time is one of the most important issues in physics cosmology philosophy and theology and hundreds of books and articles have been published in these fields However none of these studies have fully developed Ibn Arab s unique view of time in its cosmological dimensions although his conception of time is indeed central to understanding for example his controversial theory of the oneness of being One possible reason for this relative neglect is the difficult symbolic language he usually used Also he didn t discuss this subject at length in any single place in his extant works not even in chapters 59 291 and 390 of the Fut h t whose titles relate directly to time so we must piece together his overall

cosmological understanding of time from his scattered treatments in many works and different contexts within his magnum opus the Fut h t and other books Therefore this book may be considered the first comprehensive attempt to set forth all the relevant dimensions of time in Ibn Arab s wider cosmology and cosmogony To start with Ibn Arab considers time to be a product of our human imagination without any real separately existing entity Nevertheless he still considers it to be one of the four main constituents of existence We need this imagined conception of time to chronologically arrange events and what for us are the practically defining motions of the celestial orbs and other physical objects but for Ibn Arab real existence is attributable only to the actually existing thing that moves not to motion nor to time nor space in which this motion is observed Thus Ibn Arab distinguishes between two kinds of time natural and para natural and he explains that they both originate from the two forces of the soul the active force and the intellective force respectively Then he explains that this imaginary time is cyclical circular relative discrete and inhomogeneous Ibn Arab also gives a precise definition drawing on the specific usage of the Qur an and earlier Arab conceptions of time of the day daytime and night showing how these definitions are related to the relative motions of the celestial orbs including the earth where every orb has its own day and those days are normally measured by our normal observable day that we count on the earth Jung, Dante, and the Making of the Red Book: Of Fire and Form Tommaso Priviero, 2023-08-04 This book explores the genesis of the Red Book or Liber Novus through the lens of Jung s lifelong confrontation with Dante and in doing so provides the first ever thorough comparative analysis of the intertextual and symbolical correspondences between Liber Novus and the Commedia Starting from Jung s multifaceted fascination with Dante and his pivotal role in the former s visionary material at historical hermeneutical and psychological levels the book challengingly envisions Liber Novus as Jung s Divine Comedy This work finds a new way of approaching Jung s understanding of concepts such as visionary works and visionary mind and considers how this approach can enhance our vision of depth psychology Through various thematics such as the metanoia and the symbolism of animals as well as the transformative role of the feminine and the erotic and spiritual imagery of the soul this work revolves around the Jung Dante correlation Offering an original perspective within the field of Jungian and Dante scholarship this book will be of great interest to academics and postgraduate students studying in the areas of Jung Dante analytical psychology depth psychology hermeneutics and Western esoteric currents and practices The book will also appeal to Jungian analysts and psychoanalysts more broadly
