

ALPHA Plus® meter

As a 240 volt, single phase meter or a reactive meter with service validation, PQM, load profile, and communications—ALPHA Plus means powerful metering.

Elster's ALPHA Plus meter is a powerful meter that builds on the patented ALPHA+® metering technology. The ALPHA Plus meter can be a single phase, 240 volt, one-rate demand meter or a polyphase, wide voltage supply, multi-rate, real/reactive meter that validates meter service connections automatically, performs power quality monitoring, and provides load profile reading with remote communication.

Load profile and event logs

The main circuit board has 38 KB of memory available to record load profile and data logs. A sample of the quantity of load profile with 15-minute intervals:

Channels	Max. days stored
1 channel	141 days*
2 channels	56 days*

*Number of days may be fewer depending on the number of event log entries.

Load profile data is stored in nonvolatile memory. When load profile is enabled, the ALPHA Plus meter records date and time stamps for power failures, test mode entries, time changes, and demand resets. With power quality monitoring enabled, the meter also includes date and time stamps of PQM events including voltage sags.

Power quality monitoring

With PQM enabled, the meter searches for exceptions to user-defined thresholds for voltage, current, power factor, total harmonic distortion, and other items. The meter performs PQM tests 24 hours a day.

System service tests

System service tests are performed to check the validity of the electrical service as wired to the meter. The ALPHA Plus meter verifies the service type, phase rotation, and validity of phase voltages. The ALPHA Plus meter also determines if phase currents are within a user-defined threshold.

Revenue metering

AIR+ and AIR+ meters measure, store, and display a full set of energy and demand values for both real/apparent and real/reactive quantities, respectively. These meters provide two complete blocks of TOU data. The TOU rate is supported by separate fractional energy registers.

The AIR+ meter offers vectorial kVA values as a metered quantity choice. Average PF can be displayed when kW and kVA are selected as metered quantities.
