Africa Rising How 900 Million African Consumers Offer More Than You Think:

Africa Rising Vijay Mahajan, 2011-07-07 With more than 900 million consumers the continent of Africa is one of the world's fastest growing markets. In *Africa Rising*, renowned global business consultant Vijay Mahajan reveals this remarkable marketplace as a continent with massive needs and surprising buying power. Crossing thousands of miles across the continent, he shares the lessons that Africa's businesses have learned about succeeding on the continent, shows how global companies are succeeding despite Africa's unique political, economic, and resource challenges, introduces local entrepreneurs and foreign investors who are building a remarkable spectrum of profitable and sustainable business opportunities even in the most challenging locations, reveals how India and China are staking out huge positions throughout Africa, and shows the power of the diaspora in driving investment and development. Recognize that Africa is richer than you think. Africa is richer than India on the basis of gross national income (GNI) per capita, and a dozen African countries have a higher GNI per capita than China. Aim for Africa. Two opportunities exist in all parts of the market, particularly the 400 million people in the middle of the market. Find opportunities to organize the market. From retailing to cell phones to banking, companies are succeeding by building infrastructure. Develop strategies for the most youthful market in the world. Companies are recognizing opportunities from diapers to music to medicine in a market growing younger every day. Understand that Africa is not a media-dark continent. From Nollywood to satellite to broadband, media is exploding on the continent. Recognize the hidden strength of the African diaspora. The African diaspora brings resources and knowledge to African development and expands the African opportunity beyond the continent. Build Ubuntu markets. Create profitable businesses, sustainable growth, and social organizations by meeting basic human needs. *Africa Rising* VIJAY MAHAJAN with Robert E. Gunther, 2009

Redefining Business in the New Africa Lauri E. Elliott, Hartmut Sieper, Nissi Ekpott, 2011-02-10 2001-2010 proved to be a transitional decade for Africa, ushering in a new image and status for the continent. Africa began to show it was truly shaking the shackles of its colonial and chaotic past. Now that the New Africa has arrived, what does that mean? And what does it mean for business? On almost every issue that has been pegged as a negative for Africa—population boom, poverty, disease, governance, economic instability, and conflicts—there is evidence of a growing shift in the other direction. Businesses need to wake up and proactively shift to this new reality or paradigm. While business principles apply across any market, businesses need to adapt their strategies to the context of Africa to be successful and understand that Africa is one of the key regional markets in the next generation of business. *Redefining Business in the New Africa* sets out to establish a new baseline and framework for engagement in Africa, which reflects the current and future trends of a region headed for emerging market status. While Africa still has to deal with legacy issues, the power of its now and future is greater. In this book, you will learn about a new context and framework for business in Africa, a few major future trends and sectors in Africa, strategic approaches to doing business and investing in the New Africa, how to tackle or respond to some of the challenges in the New

Griffiths,2016-04-14 As Africa's strategic importance has increased over the past decade and a half United States security cooperation with the continent has expanded The most visible dimension of this increased engagement was the establishment of the U S Military Command for Africa AFRICOM Some critics are skeptical of AFRICOM's purpose and see the militarization of U S Africa policy while others question its effectiveness Recognizing the link between development and security AFRICOM represents a departure from the traditional organization of military commands because of its holistic approach and the involvement of the Department of State as well as other U S government stakeholders Nevertheless AFRICOM's effort to combine security and development faces formidable conceptual and operational challenges in trying to ensure both American and African security interests The human security perspective's emphasis on issues that go beyond traditional state centered security to include protecting individuals from threats of hunger disease crime environmental degradation and political repression as well as focusing on social and economic justice is an important component of security policy At the same time the threat of violent extremism heavily influences U S security cooperation

with Africa In this examination of the context of U S African security relations Robert J Griffiths outlines the nature of the African state traces the contours of African conflict surveys the post independence history of U S involvement on the continent and discusses policy organization and implementation and the impact of U S experiences in Iraq and Afghanistan on the U S Africa security relationship Africa s continuing geostrategic significance the influence of China and other emerging markets in the region and America s other global engagements especially in light of U S fiscal realities demonstrate the complexity of U S African security cooperation

Digital Activism in Zimbabwe Tenford

Chitanana,2024-10-21 This book investigates the role of the internet and social media in political processes in non western and non democratic contexts Using Zimbabwe as a case study the book demonstrates how activists and ordinary people deploy social media particularly Facebook to subvert an enduring hegemonic state However the book also highlights how authoritarian regimes are in turn learning and adapting to the information age challenging the impact of digital activism Studies of digital activism in the Global South are often centred around democracy but this book paints a more complex picture examining the role and effect of digital activism in challenging state hegemony in authoritarian contexts The book notes that while communication technologies help mediate activism they are also simultaneously constrained by pre existing and emergent challenges tied to the social and political context and the inherent limitations of those technologies The book investigates the tactics used by digital activists the contextual factors and restrictive political environment they operate in including the role of pro government activists and ultimately the impact of digital activism given these constraints From the case of Zimbabwe the book builds out a broader theoretical analysis of the evolution of third world protest in the digital age examining the limitations of activists actions and the ideological deficit in online activism to ferment a virulent counter hegemony

Under Construction Daniel Mains,2019-09-13 Over the past decade Ethiopia has had one of the world s fastest growing economies largely due to its investments in infrastructure and it is through building dams roads and other infrastructure that the Ethiopian state seeks to become a middle income country by 2025 Yet most urban Ethiopians struggle to meet their daily needs and actively oppose a ruling party that they associate with corruption and mismanagement In Under Construction Daniel Mains explores the intersection of development and governance by examining the conflicts surrounding the

construction of specific infrastructural technologies asphalt and cobblestone roads motorcycle taxis and hydroelectric dams These projects serve as sites for nation building and the means for the state to assert its legitimacy The construction process as well as Ethiopians experience of living with the disruption of construction zones reveals the tension and conflict between the promise of progress and the possibility of failure Mains demonstrates how infrastructures as both ethnographic sites and as a means of theorizing such concepts as progress development and the state offer a valuable contrast to accounts of African abjection and decline
