The authors identify four distinct yet overlapping roles for the media the monitorial role of a vigilant informer collecting and publishing information of potential interest to the public the facilitative role that not only reports on but also seeks to support and strengthen civil society the radical role that challenges authority and voices support for reform and the collaborative role that creates partnerships between journalists and centers of power in society notably the state to advance mutually acceptable interests Demonstrating the value of a reconsideration of media roles Normative Theories of the Media provides a sturdy foundation for subsequent discussions of the changing media landscape and what it portends for democratic ideals
