

Agricultural Science (501/1, 2, 3) Preamble

The Examinations Council of Zambia has made adjustments to the assessment of Agricultural Science at Grade 9 level so as to be in line with the revised Agricultural Science Junior Secondary School Syllabus of 2013 developed by Curriculum Development Centre (CDC) of the Ministry of Education, Science, Vocational Training and Early Education (MESVTEE).

The purpose of the specimen papers is to guide the teachers and would be candidates on the nature and content of the Grade 9 Agricultural Science examination which will begin to be administered in 2015 examination session.

Assessment Aims and Objectives

The purpose of the Grade 9 Agricultural Science examination is to test candidate's understanding and ability to apply the subject in real life. Assessment of Grade 9 students in Agricultural Science will contribute to the certification of candidates, measurement of academic attainment, promotion of learners to Grade 10 and feedback to educators on effectiveness of instruction. The Grade 9 examination will assess candidate's performance against the following three (3) Assessment Objectives:

1. knowledge with understanding
2. handling of information and problem solving
3. practical activities.

Test Design

The Grade 9 examination will consist of three papers: Paper 1 (501/1), Paper 2 (501/2) and Paper 3 (501/3).

Paper 1 (1 Hour) will consist of 40 compulsory multiple choice items (questions) carrying 40 marks. The 40 questions will be drawn from all the topics of the syllabus.

Paper 2 (2 hours) will consist of 8 compulsory structured questions carrying 10 marks each. The 8 questions will also cover all the topics in the syllabus.

Paper 3 will be a school-based project done in the period beginning from Grade 8 term 3 and ending by Grade 9 term 2. Each pupil is expected to maintain records of project work in an exercise book or file which should be available for inspection and assessment. The Head of Department, Headteacher and Standards Officers in charge of Examinations at district level will monitor projects for candidates at different stages of implementation.

The number of questions and mark weighting is summarised below;

COMPONENT	PAPER TYPE	NO. OF QUESTIONS	MARKS	WEIGHTING OF MARKS	TIME ALLOWANCE
501/1	Multiple Choice	40	40	29%	1 hour
501/2	Theory	8	80	57%	2 hours
501/3	Project	1	20	14%	2 hours

Foreign Direct Investment in Agriculture Jan

Schüpbach,2015-10-07 Foreign direct investment in agriculture and land has increased substantially since the 2007 2008 food price crisis However there is a severe lack of quantitative evidence on its economic impact Therefore the primary goal of this study was to collect and analyze empirical evidence in order to better understand the potential benefits and pitfalls of such investments and related processes of agricultural commercialization In particular the study tests the effect of two strategies for including smallholder farmers into modern food supply chains 1 Outgrower schemes i e a type of contract farming whereby small scale farmers produce crops for large scale farming enterprises 2 Wage employment on large scale estates The central part of the study looks at one specific investment project in the Zambian sugar cane sector This sectoral focus was supplemented by a broader cross sectoral analysis of a large nationally representative panel survey Overall the evidence suggests that large scale investments by foreign as well as domestic companies and especially the model of cooperation with smallholder farmers in outgrower schemes can indeed have positive and significant effects on the income and wealth of rural households

Sustainability Standards and Global Governance

Archna Negi,Jorge Antonio Pérez-Pineda,Johannes Blankenbach,2020-07-02 This open access book focuses on the issue of sustainability standards from the perspective of both global governance frameworks and emerging economies It stems from the recognition that the accelerated pace of economic globalization has generated production and consumption patterns that are generating sustainability concerns Sustainability standards and regulations are increasingly being used in a bid to make global consumption and production more sustainable Given the dense inter connectedness of economic affairs globally the use of sustainability standards has become a concern of global governance who face the challenge of achieving a balance between the use of standards for genuine sustainability objectives and not allowing them to turn into instruments of protectionism or coercion The emerging economies given their increasing engagement with the global economy are most impacted by the use of sustainability standards The emphasis of emerging economies in this book is retained both by using case studies from these economies and by collating perceptions and assessments of those located in these economies The case studies included span sectors such as palm oil forestry food quality vehicular emissions and water standards and address the problems unique to the emerging economies including capacity building for compliance with standards adapting

international standards in domestic contexts and addressing the exclusion of small and medium enterprises etc Complex interfaces and dynamics of a global nature are not limited to the thematic of this book but also extend to the process through which it was written This book brings together insights from developed as well as emerging economies Germany India Mexico Brazil Indonesia Pakistan Mexico and China It also brings together scholars and practitioners to jointly ponder upon the conceptual aspects of the global frameworks for sustainability standards This book is a very useful resource for researchers and practitioners alike and provides valuable insights for policy makers as well

Manuka Cliff Van Eaton, 2014-10-09 Not so long ago in a small island nation in the South Pacific beekeepers produced a most peculiar honey It was much darker than the clover honey everyone put on their toast in the morning and it tasted very different In fact the honey was a problem it was hard to get out of the combs and even harder for beekeepers to sell Today that honey manuka from New Zealand is known around the world It fetches high prices and beekeepers do everything in their power to produce as much of it as possible Wound dressings containing manuka honey are used in leading hospitals and it has saved the lives of patients infected with disease causing bacteria that are resistant to standard antibiotic drugs In so doing it has forced the medical profession to rethink its position on the therapeutic properties of natural products This book chronicles the remarkable rags to riches story of manuka honey as seen through the eyes of a New Zealand beekeeping specialist who watched it unfold from the very beginning It s a great tale of science in which an inquisitive university lecturer found something totally unexpected in a product everyone had written off It s also an entertaining account of the way that seemingly simple discovery caught the international media s attention helping enterprising New Zealanders to develop manuka honey based products and take them all around the globe But above all else it s a story of hope for the future

sounding a note of optimism in a world that for good reason feels saddened and sometimes even afraid about the future of the special relationship we humans have always had with those marvellous creatures the honey bees *Good beekeeping practices for sustainable apiculture* Food and Agriculture Organization of the United Nations, Apimondia, Chinese Academy of Agricultural Sciences, Istituto Zooprofilattico Sperimentale Lazio e Toscana, 2021-09-21 Bees provide a critical link in the maintenance of ecosystems pollination They play a major role in maintaining biodiversity ensuring the survival of many plants enhancing forest regeneration providing sustainability and adaptation to climate change and improving the quality and quantity of agricultural production systems In fact close to 75 percent of the world's crops that produce fruits and seeds for human consumption depend at least in part on pollinators for sustained production yield and quality Beekeeping also called apiculture refers to all activities concerned with the practical management of social bee species These guidelines aim to provide useful information and suggestions for a sustainable management of bees around the world which can then be applied to project development and implementation *Interactive Effects of Plant Growth-Promoting Microbes and Nanoparticles on the Physiology, Growth, and Yield of Crops* Waheed Akram, Aqeel Ahmad, Nasim Ahmad Yasin, 2024-03-13
