

Principles of Agroecosystem Analysis (Conway, 1986)

- It isn't necessary to know everything about an agroecosystem in order to produce a realistic and useful analysis ('optimal ignorance').
- Understanding the behavior and important properties of an agroecosystem requires knowledge of only a few key functional relationships.
- Producing significant improvements in the performance of an agroecosystem requires changes in only a few key management decisions.
- Identification and understanding of these key relationships and decisions requires a limited number of key questions are defined and answered.

Training Notes for Agroecosystem Analysis and Rapid Rural Appraisal Gordon R. Conway, Jennifer A. McCracken, Jules N. Pretty, International Institute for Environment and Development. Sustainable Agriculture Programme, 1987 After the Green Revolution Gordon R. Conway, Edward B. Barbier, 2013-11-05 The Green Revolution of the 60 s and 70 s produced immense gains in food cereal production in the Third World But there are huge problems in the post revolutionary era farmers with small or marginal holdings have benefited less than wealthier farmers intensive mono cropping has made production more susceptible to environmental stresses and shocks Now there is evidence of diminishing returns from intensive and intensively chemical agricultural production What is needed is a new approach equally revolutionary but different in its ideas and style The authors set out what they mean by sustainable agriculture in the new era and look at the effects of international economic restraints and of national policies on the kind of development they see as necessary They chart a path for sustainable livelihoods for Third World farmers enmeshed by forces outside their control They describe methods of evaluating and resolving the tough trade offs all levels of intervention from international trade down to the individual farm This book cannot provide all the answers but it does indicate what international conditions we need to be aware of what national policies we need to advocate and what approaches at the local level we need to adopt to ensure the goal of agricultural sustainability Originally published in 1990 **The Structure and Dynamics of Human Ecosystems** William R. Burch, Gary E. Machlis, Jo Ellen Force, 2017-01-01 Cover Half Title Title Copyright Contents Preface Acknowledgments ONE Introduction TWO An Overview of the Model THREE Lessons and Legacies FOUR The Ecosystem Concept in Biology FIVE The Roots of Human Ecology SIX Key Components and Variables for Analyzing Human Ecosystems SEVEN Goals Strategies and Tactics for Inquiry and Action EIGHT Using the Model for Science during Crisis NINE Revitalizing Human Communities and Reclaiming Biological Communities The Baltimore Story TEN Toward a More Perfect Civic Order Lessons Learned from Research ELEVEN Extending the Capability of the Model TWELVE Leaning Forward Future Challenges to Human Ecosystems THIRTEEN Conclusion Notes Index A B C D E F G H I J K L M N O P Q R S T U V W Y Z **Economics, Natural-Resource Scarcity and Development (Routledge Revivals)** Edward B Barbier, 2013-06-26 Global warming is an increasing problem tropical forests are being wiped out and major upper watersheds are being degraded Using insights provided by environmentalism ecology and thermo dynamics this book first published in 1989 outlines an economic approach to the use of natural resources and particularly to the problem of environmental degradation Edward Barbier reviews and critiques the long past of environmental and resource economics and then goes on to elaborate an economics which allows us to develop alternative strategies for dealing with the problems faced With examples drawn from Latin America and Indonesia he not only develops a major theoretical advance but shows how it can be applied Barbier s work is an important and relevant contribution to the discussion surrounding the economics of environmental sustainability

Environments and Livelihoods Koos Neefjes, 2000 This book is intended to be used to support the campaigning and lobbying work of local and international development organizations to improve the formulation and implementation of development strategies and to strengthen participatory project planning monitoring and impact assessment in poverty and environmental change **Publications of the International Agricultural Research and Development Centers**, 1989

RRA Notes Number 1, **The Economics of Sustainability** John C.V. Pezzey, Michael A. Toman, 2017-09-08 Before the late 1980s when the ideas of sustainability and sustainable development to the forefront of public debate conventional neo classical economic thinking about development and growth had rarely given any consideration to the needs of future generations or the sustainability of natural resource use Defining sustainability broadly as intergenerational fairness in the long term decision making of a whole society and using established economic concepts this selection of refereed journal articles brings a famously ill defined concept into sharp focus providing academics at all levels with a formidable research tool Spanning thirty years of the most important philosophical theoretical and empirical contributions from both critics and defenders of neo classical assumptions and methods of economic analysis this focused collection of papers constitutes a unique balanced resource on the full range of intellectual debates surrounding the economics of sustainability
