Strategic management of an airline. Developing a proactive strategy for Airbus Charles Ekweruo, 2016-04-07 Project Report from the year 2012 in the subject Business economics Business Management Corporate Governance grade First Class University of Bradford School of Management language English abstract This report will give a comprehensive analysis of Airbus based on strategic analysis internal and external and strategic formulation and will conclude with a recommendation One of the most vital tools for human success is strategy Even though influential people for example Barrack Obama and Warren Buffet epitomizes luck what really made them successful was to have a clear goal understanding of their competitive environment and most importantly identifying opportunity when they appeared and to have the clarity of direction and the tractability necessary to exploit these chances effective implementation Reason is that without a consistency of direction based on understanding their environment and a keen awareness of how to maneuver into a position of advantage competitors will out compete them Therefore strategy refers to having a succinct and articulate goal and plans to achieving it put succinctly a good strategy is about winning In light of constant change and relentless competition strategy becomes less about building positions of sustained competitive advantage rather more about developing the responsiveness and flexibility to create successive

temporary advantages the economic downturn in 2008 9 is encouraging new thinking about the purpose of business Disillusion with shareholder value capitalism has been accompanied by renewed interest in corporate social responsibility ethics and sustainability of the natural environment and the role of social legitimacy in long term corporate success

Boeing Vs. Airbus Bhavesh Patel, Manchester Business School, 2006 *Airbus Versus Boeing Revisited* Douglas A. Irwin, Nina Pavcnik, 2001 This paper examines international competition in the commercial aircraft industry We estimate a discrete choice differentiated products demand system for wide body aircraft and examine the Airbus Boeing rivalry under various assumptions on firm conduct We then use this structure to evaluate two trade disputes between the United States and European Union Our results suggest that aircraft prices increased by about 3 7 percent after the 1992 U S E U agreement on trade in civil aircraft that limits subsidies This price hike is consistent with a 5 percent increase in firms marginal costs after the subsidy cuts We also simulate the impact of the future entry of the Airbus A 380 super jumbo aircraft on the demand for other wide bodied aircraft notably the Boeing 747 We find that the A 380 could reduce the market share of the 747 by up to 14 8 percentage points in the long range wide body market segment depending upon the discounts offered on the A 380 but would reduce the market for Airbus s existing wide bodies by an even greater margin *Boeing Versus Airbus* John Newhouse, 2007 For William S Farmer ***Airbus Versus Boeing*** Eric Van Den Steen, 2016 *Airbus Versus Boeing (C)* Wendy Coleman, Graduate School of Business Administration (Cambridge, Mass.), 1988 ***Airbus Versus Boeing*** , 2014
