Squadron Leader M A Saunders RAAF Fighter Combat Instructor Plenty of books describe the technical aspects of flying airplanes but the human performance psychology has largely been ignored There is very little information for pilots on how to improve on high performance skills needed for high stress and high workload types of piloting This book addresses that gap and gives pilots an understanding of the best and most efficient techniques on improving their aircraft handling in a way that will garner real results without needing to turn a propeller I only wish I had this book years ago

Anthony Crichton Browne Airbus A320 Captain competition aerobatic pilot aviation podcaster During my training as a military pilot I utilized some of the strategies described in this book However my personal implementation was haphazard and lacked the methodical and deliberate implementation required to apply them in an effective manner This book describes the structure needed to effectively apply these learning techniques as well as introducing many new and complementary ones I had not considered I am sure that my aviation training and subsequent career would have benefitted
