Operational, Financial, and Strategic Analysis

Decreasing Fleet Size/Composition

It makes financial sense for GJ Client to operate 2 ULJs after 875 flight hours per year.

- This is driven by the amount of international supplemental IT required to augment a fleet with 1 international aircraft.
- At 1,500 hours per year, while ownership of 2 ULJs is projected to save GJ Client \$39 million in LCC and \$29 million in NPV compared with sale of 1 ULJ because of the additional outsourcing required.
 - Ownership of 2 ULJs is projected to save \$48 million in LCC and \$36 million in NPV compared with sale of 1 ULJ and purchase of 1 SWS because the SWS would not offset all domestic travel or contribute internationally.

Life Cycle Cost (LCC) of Different Fleet Compositions

Overview of Flight Time

GJ Client has decreased flight time from 2,000-1,500 annual hours while reducing to 2 aircraft over the last 3 years.

- GJ Client is unlikely to sustain a 1,500 hour per year mission indefinitely on 2 aircraft without either: replacing aircraft more frequently, adding an aircraft, or shortening increasing portions of the mission.
 - As the aircraft begin entering heavy maintenance (3 years and after) need for supplemental IT will increase.
 - The current aircraft have been able to meet the mission so far because they are relatively young and have not yet entered major maintenance.

An Airline Fleet Planning Model Norman Stanley Clerman, 1967 **An Airline Fleet Planning Model with Financial Constraints** Henry B. Faulkner, 1970 **IFA/1** Herve Duchesne de Lamotte, 1981 This thesis investigates the Airline Fleet Assignment models which have been designed during the past 10 years within MIT's Flight Transportation Laboratory. Emphasis is placed on developing an interactive computer system called IFA 1 which simplifies the use of fleet assignment models and improves the insertion or modification of necessary data. The first section gives a general review of the mathematical models used for vehicle planning in air transportation with special attention given to the Airline Fleet Assignment and Fleet Planning problem. The techniques used to solve these problems are discussed and one model of particular interest, the FA4 model, is introduced. The second part describes how FA4 is used in practice and points out some of its major deficiencies. An improvement is proposed through the means of an interactive computer package available at the Flight Transportation Laboratory. Future modifications to this interactive system are also discussed. Finally, an alternative solution is suggested to one of the theoretical problems which underlies the Fleet Assignment model, the phantom frequency problem. This issue is discussed and a new set of equations is proposed which improves the efficiency of the model. **A Model of Airline Fleet Planning** John F. Kososki, 1970 *An airline fleet planning model* David Joseph Sassom, 1975

Supplemental Airline Fleet Planning: a Mathematical Programming Approach Reed Heber Randall, 1969 *Cell Fleet Planning* Armando C. Silva, Massachusetts Institute of Technology, Flight Transportation Laboratory, 1984 The objective of this thesis is to demonstrate the practical use of the Cell Fleet Planning Model in planning the fleet for the U.S. airline industry. The Cell Model is a cell theory linear programming approach to fleet planning. Four scenarios of the Model are presented, three with a nine cell representation of the system and a test case using a thirty cell representation. A detailed analysis of the results for each case has been performed. A comparison between the cases with other forecasts and with recent historical data which has also been analyzed is shown. The Cell Model has produced realistic results. It has proven to be efficient regarding computer time and labor intensity given the size of the problem and to be viable for industry use. Should no dramatic changes in the airline route system structure occur in the next ten years, results obtained show a greater need for small capacity short range aircraft, e.g. B737's, B757's and DC9's than for other aircraft types. **The Airline Fleet Planning Process** George William Hamlin, 1975 *Fleet Planning and Aircraft Selection Decisions Models* Vero Lalao Ratsifandrihamanana, 1997 **A Long Range Fleet Planning Model for the Air Transport Industry** Dennis F. Vailakis, Douglas Aircraft Company, 1982 *Business Model of Aircraft Fleet Planning Using ANN* Partha Kumar Pandit, M. Ahsan Akhtar Hasin, 2018 *Fleet Planning for the Air Transport Industry* Dennis Francis Xavier Mathaisel, 1980 **Robust Airline Fleet Assignment** Barry Craig Smith, 2004 Robust Airline Fleet Assignment

Barry C Smith 140 Pages Directed by Dr Ellis L Johnson Fleet assignment models are used by many airlines to assign aircraft to flights in a schedule to maximize profit Major airlines report that the use of fleet assignment models increases annual profits by more than 100 million The results of fleet assignment models affect subsequent planning marketing and operational processes within the airline Anticipating these processes and developing solutions favorable to them can further increase the benefits of fleet assignment models We propose to produce fleet assignment solutions that increase planning flexibility and reduce cost by imposing station purity limiting the number of fleet types allowed to serve each airport in the schedule We demonstrate that imposing station purity on the fleet assignment model can limit aircraft dispersion in the network and make solutions more robust relative to crew planning maintenance planning and operations Because station purity can significantly degrade computational efficiency we develop a solution approach Station Decomposition which takes advantage of airline network structure Station Decomposition uses a column generation approach to solving the fleet assignment problem we further improve the performance of Station Decomposition by developing a primal dual method that increases the solution quality and model efficiency Station Decomposition solutions can be highly fractional we develop a fix and price heuristic to efficiently find integer solutions to the fleet assignment problem Airline profitability can be increased if fleet assignment models anticipate the effects of marketing processes such as revenue management We develop an approach ODFAM which incorporates airline revenue management effects into the fleet assignment model We develop an approach to incorporate station purity and ODFAM using a combination of column and cut generation This approach can increase airline profit up to 27 million per year

Application of Goal Programming to the Airline Fleet Planning Constantinos Zacharias Vailakis,1982 **Aircraft Fleet Planning** Mohd. Yusoff Bin Sulaiman,1989 **Airline Fleet Assignment and Schedule Design** Manoj Lohatepanont,2002 Cont Our study shows that the benefits of modeling these elements can be as large as 100 million annually for a major U S airline In addition we show that modeling flight leg interdependence is more important than demand stochasticity for hub and spoke fleet assignment problems We develop two models for schedule design one assuming that the market share of an airline remains constant with schedule changes and the other assuming that market share varies with schedule changes The constant market share model while less precise in its modeling is much easier to solve than the variable market share model We estimate that the potential benefits of these models range from 100 to 350 million annually **Aircraft Flight Planning Models for Use in Evaluation of the Airline Profit Function** Loren N. Rea,1960 **Planning for the Introduction of a New Aircraft Into an Airline Fleet** H. W. Barenz,Society of Automotive Engineers,1964

Airline Fleet Planning Models Mit Opencourseware Introduction

In today's digital age, the availability of Airline Fleet Planning Models Mit Opencourseware books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Airline Fleet Planning Models Mit Opencourseware books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Airline Fleet Planning Models Mit Opencourseware books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Airline Fleet Planning Models Mit Opencourseware versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Airline Fleet Planning Models Mit Opencourseware books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Airline Fleet Planning Models Mit Opencourseware books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Airline Fleet Planning Models Mit Opencourseware books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them

accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Airline Fleet Planning Models Mit Opencourseware books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Airline Fleet Planning Models Mit Opencourseware books and manuals for download and embark on your journey of knowledge?
