Low Cost Carriers Lucy Budd, Stephen Ison, 2017-07-05 Low cost carriers LCCs represent one of the most exciting and dynamic yet often contentious developments in recent commercial aviation history Formed as a direct result of policies of airline deregulation and liberalisation that were initiated in the United States in the late 1970s before being implemented in certain European Australasian Latin American and other world markets from the mid 1990s onwards to encourage competition LCCs have been responsible for progressively reconfiguring the spatial patterns operational practices and passenger experiences of flight In the process they have enabled growing numbers of people to fly to more places more frequently and at lower cost than had been previously possible In so doing however they have generated a number of socio economic and environmental challenges The 23 essays included in this volume provide a detailed insight into the emergence expansion and evolution of the low cost carrier sector worldwide The volume covers deregulation and liberalisation of the global airline sector the business models and operating characteristics of low cost carriers the changing nature of the airline airport relationship LCC network characteristics issues of pricing and competition and the current impacts and likely future trajectories

Competition and Regulation in the Airport Sector Marcelo Cesar Guimarães, 2025-11-06 Over recent decades pro competitive reforms in the civil aviation industry particularly in air transport have increased competition reduced prices and improved services for consumers Although airports have also evolved changes in this sector have been less pronounced Nevertheless airports face today growing competitive pressures and are less often seen as natural monopolies Markets within airports such as ground handling services have become more competitive as well In this context the book explores the global shift towards pro competitive regulation in the airport sector with a particular focus on Brazil It shows that while important steps have been taken efforts remain at an early stage and require stronger institutional arrangements to address all dimensions of airport regulation Targeted at civil aviation

regulators and policymakers as well as competition professionals the book calls for co ordinated action between competition authorities and civil aviation bodies A unified regulatory agenda supported by proactive competition enforcement and advocacy could embed competition principles more deeply into airport regulation boosting efficiency and delivering real benefits to consumers *Air Transport and Operations* Richard Curran,Wim J.C.
