Jesuit Science and the End of Nature's Secrets Mark A. Waddell,2016-03-09 Jesuit Science and the End of Nature's Secrets explores how several prominent Jesuit naturalists including Niccolò Cabeo Athanasius Kircher and Gaspar Schott tackled the problem of occult or insensible causation in the seventeenth century The search for hidden causes lay at the heart of the early modern study of nature and included phenomena such as the activity of the magnet the marvelous powers ascribed to certain animals and plants and the hidden destructive forces churning in the depths of the Earth While this was a project embraced by most early modern naturalists however the book demonstrates that the Jesuits were uniquely suited to the study of nature's hidden secrets because of the complex methods of contemplation and meditation enshrined at the core of their spirituality Divided into six chapters the work documents how particular Jesuits sought to reveal and expose nature's myriad secrets through an innovative blending of technology imagery and experiment Moving beyond the conventional Aristotelianism mandated by the Society of Jesus they set forth a vision of the world that made manifest the works of God as Creator no matter how deeply hidden those works were The book thus not only presents a narrative that challenges present day assumptions about the role played by Catholic religious communities in the formation of modern science but also captures the exuberance and inventiveness of the early modern study of nature

Religious Individualisation Martin Fuchs,Antje Linkenbach,Martin Mulrow,Bernd-Christian Otto,Rahul Björn Parson,Jörg Rüpke,2019-12-16 This volume brings together key findings of the long term research project Religious Individualisation in Historical Perspective Max Weber Centre for Advanced Cultural and Social Studies Erfurt University Combining a wide range of disciplinary approaches methods and theories the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods in particular in Asia the Mediterranean and Europe from antiquity to the recent past Contrary to standard theories of modernisation which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon the chapters reveal processes of religious individualisation in a large variety of non Western and pre modern scenarios Furthermore the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency the pluralisation of religious options dynamics of de traditionalisation and privatisation the development of elaborated notions of the self the facilitation of religious deviance and on the notion of dividuality The Scientification of Religion Kocku von Stuckrad,2014-05-08 The enigmatic relation between religion and science still presents a challenge to European societies and to ideas about what it means to be modern This book argues that European secularism rather than pushing back religious truth claims in fact has been religiously productive itself The institutional establishment of new disciplines in the nineteenth century such as religious studies anthropology psychology classical studies and the study of

various religious traditions led to a professionalization of knowledge about religion that in turn attributed new meanings to religion. This attribution of meaning resulted in the emergence of new religious identities and practices. In a dynamic that is closely linked to this discursive change, the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning, resulting in a special form of scientific religiosity that has gained much influence in the twentieth century. Applying methods that come from historical discourse analysis, the book demonstrates that religious semantics have been reconfigured in the secular sciences. Ultimately, the scientification of religion perpetuated religious truth claims under conditions of secularism.

Basset, J. Bardin, P. Gosse, M. Pinet, Baron de Tschuody, 2015-06-24. This Text presents an introduction to the Alchemical Philosophy of the Ancient Mysteries; it contains extracts from many different books and is organized into 2 main sections:

1. An explanation of the Alchemical Symbolism which has 3 parts that are mostly extracts from 3 of Jean Marie Ragon's books published together in 1853: Masonic Orthodoxy, Philosophical Masonry and Occult Masonry. Taken together, these extracts are a wonderful synthesis of how Masonry is a continuation of the Ancient Mysteries.
2. Contains the Instructions and/or Catechisms from 3 different French Masonic orders: FRENCH RITE (early to mid 1700s), ADONHIRAMITE RITE (late 1700s) and MEMPHIS RITE (mid 1800s). These show the Ancient Philosophical Hermetic and Alchemical symbolism which was explained in the first section.

Finally, in the Editor's Appendix, there is an explanation of the Masonic Tablet followed by an article about the Generation of Beings and then a list of the Shem Hamphorash or the 72 Names of God.
