Clack, 2000-08-30 From the Middle Ages to the close of the 17th century alchemy was fundamental to Western culture as scores of experimenters sought to change lead into gold Though its significance declined with the rise of chemistry alchemy continued to captivate the imagination of writers and its images still appear in modern creative works This book examines

the literary representation of alchemical theory and the metaphor of alchemical regeneration in the works of Edward Taylor Edgar Allan Poe Nathaniel Hawthorne and Margaret Fuller While Taylor used alchemical metaphors to illustrate the redeeming grace of God upon the soul these same metaphors were used by Poe Hawthorne and Fuller to depict a broader concept of redemption These later writers used alchemical imagery to describe both the regeneration of the individual and the possible transformation of society For Poe alchemy became a metaphor for the transforming power of imagination for Hawthorne it became a means of representing the redeeming power of love for Fuller it figured the reconciliation of gender opposites Thus these four American writers incorporated the idea of regeneration in their works and the tropes and metaphors of the medieval alchemists provided a fascinating way of imagining the transformative process *Alchemy*

Ancient and Modern Herbert Stanley Redgrove,1969 Dr Redgrove gives us a brief account of alchemistic doctrines both in their relation to mysticism and to physical science Then he gives us a short history of Alchemy in the form of biographies of the most noted alchemists The Diary of an Alchemist Dr. Douglas M. Baker,2014-04-15 *The Diary of an Alchemist* In its attempt to demonstrate the applicability of the fundamental principles of Mysticism to the things of the physical realm Alchemy apparently failed and ended its days in fraud It appears however that this true aim of alchemistic art particularly the demonstration of the validity of the theory that all the various forms of matter are produced by an evolutionary process from some one primal element or quintessence is being realised by recent research in the domain of physics and chemical science The object of the alchemist s search was to satisfy their material needs their intellectual capacities and their spiritual yearning Alchemists of the nobler sort always made the first of these objects subsidiary to the other two There is a distinct difference between what may be called esoteric and exoteric alchemy The latter has an outer and more direct approach in which transmutation is attempted through the employment of purely physical forces This has been the main attraction for the quacks and the curious and has succeeded in concealing mercifully the esoteric approach to alchemy The true alchemist is someone capable of radiating his essence thus affecting the centermost being of those about him This work biographical in nature reveals the author s own struggle in working the basic theme of alchemy which is the acceptance and expression of Cosmic Fire in the service of humanity This is the path of a fire god his birth initiation into and baptism by Fire The alchemists saw the likeness of it in so many chemical reactions in their laboratories that they were struck by certain parallels After all they were witnessing the birth of modern chemistry with all its inorganic phenomena of amalgams silver gold and mercurial platings without any of the rationale which a chemist possesses today This thoroughly researched volume contains
