and the outputs to be produced by the program iii Describe the algorithm that you intend to implement in the program This step involves top down design and stepwise decomposition using pseudocode or flow charts iv Turn the algorithm into MATLAB statements v Test the MATLAB program This step includes unit testing of specific functions as well as exhaustive testing of the final program with many different data sets 2 Emphasis on Functions The book emphasizes the use of functions to logically decompose tasks into smaller sub tasks It teaches the advantages of functions for data hiding It also emphasizes the importance of unit testing functions before they are combined into the final program In addition the book teaches about the common mistakes made with functions and how to avoid them 3 Emphasis on MATLAB Tools The book teaches the proper use of MATLAB s built in tools to make programming and debugging easier The tools covered include the Editor Debugger the Workspace Browser the Help Browser and GUI design tools
