The Nature of Nature Irv Dardik, Estee Dardik Lichter, 2017-05-16 Generations of researchers have failed to answer our most basic questions about nature What is everything made of How do things change and how do they work What is life In *The Nature of Nature* visionary scientist Irv Dardik tackles these questions by introducing his discovery of SuperWaves a singular wave phenomenon whose design generates what we experience as matter space time motion energy and order and chaos Simply put the SuperWaves principle states that the fundamental stuff of nature is waves waves waving within waves to be exact Dardik challenges the rationality of accepting a priori that the universe is made of discrete particles Instead by drawing from his own discovery of a unique wave behavior and combining it with scientific facts he shows that every single thing in existence from quantum particles to entire galaxies is waves waving in the unique pattern he calls SuperWaves The discovery of SuperWaves and the ideas behind it while profound can be intuitively grasped by every reader whether scientist or layperson Touching on everything from quantum physics to gravity to emergent complexity and thermodynamics to the origins of health and disease it shows that our health and the health of the environment and civilization depend upon our understanding SuperWaves *The Nature of Nature* is an absorbing account that combines Dardik s contrarian look at the history of science with philosophical discussion his own groundbreaking research and hope for the future

Things Fall Apart? Michael Paget-Wilkes,2020-05-29 This book calls for a major paradigm shift in the church's thinking and practice if the church is to engage with the upcoming generations of the third decade of this fast changing twenty first century Just as the church has had to adapt to a changing context in the past it now needs to engage seriously with this post enlightenment post human techno centric age of artificial intelligence However the church also needs to recall its counter cultural prophetic role following Elijah Jeremiah Amos Jesus and Paul challenging society as it faces complex dilemmas raised by technology driven development in these unprecedented times The church will have to acknowledge unaddressed weaknesses in the past of identifying with established power rather than vulnerability and the marginalized of depending on a hierarchical ministerial order at the expense of the ministry of every believer of acquiescing to materialist anthropocentric and consumerist growth as an undisputable norm This book develops the vision of a church engaged in the mission of God of welcoming technological development but with an eye on kingdom values of promoting innovation so long as it does not result in a growth of inequality or at the expense of the environment of pointing towards a humanity that deepens its relationships with its Creator its fellow humans and its environment The author calls on grassroots believers to reflect and act within their local communities as inspired and empowered daughters and sons of God in the knowledge that following Jesus Christ provides a radical new paradigm for living learning and leading in and through these times of epochal change

Lovesey,2016-03-03 Addressing a neglected dimension in postcolonial scholarship Oliver Lovesey examines the figure of the postcolonial intellectual as repeatedly evoked by the fabled troika of Said Spivak and Bhabha and by members of the pan African diaspora such as Cabral Fanon and James Lovesey s primary focus is Ng g wa Thiong o one of the greatest writers of post independence Africa Ng g continues to be a vibrant cultural agitator and innovator who in contrast to many other public intellectuals has participated directly in grassroots cultural renewal enduring imprisonment and exile as a consequence of his engagement in political action Lovesey s comprehensive study concentrates on Ng g s non fictional prose writings including his largely overlooked early journalism and his most recent autobiographical and theoretical work He offers a postcolonial critique that acknowledges Ng g s complex position as a virtual spokesperson for the oppressed and global conscience who now speaks from a location of privilege Ng g s writings Lovesey shows display a seemingly paradoxical consistency in their concerns over nearly five decades at the same time that there have been enormous transformations in his ideology and a shift in his focus from Africa s holocaust to Africa s renaissance Lovesey argues that Ng g s view of the intellectual has shifted from an alienated nearly neocolonial stance to a position that allows him to celebrate intellectual activism and a return to the model of the oral vernacular intellectual even as he challenges other global intellectuals Tracing the development of this notion of the postcolonial intellectual Lovesey argues for Ng g s rightful position as a major postcolonial theorist who helped establish postcolonial studies **Tired of Being Tired Study Guide** Jess Connolly,2024-04-09 It s time to quit the

Very Personal Relationship. "God" and the Christian Religion and me Calvin K. Tillson Preddie,2011-10-22 Our Sun is 26 000 light years away from the center of the Milky Way Galaxy and when we consider the size of the Milky Way Galaxy and view the relative size of the planets it puts the Earth into true perspective However it also magnifies Who What or Which Presence or Force s was were in the Beginning which is responsible for all the celestial bodies and all life of any kind in this and or any other universe This book is really about one individual s faith that whoever whatever or whichever was in the Beginning is of a Divine Nature to which he has assigned the term God It is about a Divinity that transcends the limited God as discussed in Romans 1 which was made to resemble the corruptible man which displeased God and lead to unseemly

punishment for humans It is about faith in God of our and every universe The author believed then and more so now that everything that happened was exactly as God wished it to be He contends that events were used to encourage man to be innovative curious loving caring and also the opposites of all these characteristics and others so that progress of civilization could be accomplished which would lead to an eventual better human to populate the world of the future and perhaps to live in harmony with other life forms from other stellar bodies The book is about a God that members of all religions could believe in and which could be viewed satisfactorily even by some disbelievers This is the author s second non fiction work
