Women in the History of Analytic Philosophy Jeanne Peijnenburg,Sander Verhaegh,2023-01-01 This book contains a selection of papers from the workshop Women in the History of Analytic Philosophy held in October 2019 in Tilburg the Netherlands It is the first volume devoted to the role of women in early analytic philosophy It discusses the ideas of ten female philosophers and covers a period of over a hundred years beginning with the contribution to the Significs Movement by Victoria Lady Welby in the

second half of the nineteenth century and ending with Ruth Barcan Marcus's celebrated version of quantified modal logic after the Second World War. The book makes clear that women contributed substantially to the development of analytic philosophy in all areas of philosophy from logic, epistemology and philosophy of science to ethics, metaphysics and philosophy of language. It illustrates that although women's voices were no different from men's as regards their scope and versatility, they had a much harder time being heard. The book is aimed at historians of philosophy and scholars in gender studies. **Le**
