Regardless of Frontiers Agnes Callamard, Lee C. Bollinger, 2021-02-09 The United Nations Universal Declaration of Human Rights in 1948 proclaimed a vision of freedom of expression exercised regardless of frontiers Nonetheless laws and norms regarding the freedom or limits of expression are typically established and understood at the national level In today s interconnected world newfound threats to free expression have suddenly arisen How can this fundamental right be secured at a global level This volume brings together leading experts from a variety of fields to critically evaluate the extent to which global norms on freedom of expression and information have been established and which actors and institutions have contributed to their diffusion The authors also consider ongoing and new challenges to these norms from conflicts over hate speech and the rise of populism to authoritarian governments as well as the profound disruption introduced by the internet Together the essays lay the groundwork for an international legal doctrine on global freedom of expression that considers issues such as access to government held information media diversity and political speech As the world risks renouncing previous commitments to the freedom of expression **Regardless of Frontiers** serves as a timely reminder of just how much is at stake and what needs protecting Clifford Algebras and their Applications in Mathematical Physics F. Brackx, R.

Delanghe, H. Serras, 2012-12-06 This International Conference on Clifford Algebras and Their Application in Mathematical

Physics is the third in a series of conferences on this theme which started at the University of Kent in Canterbury in 1985 and was continued at the Université de Science et Technique du Languedoc in Montpellier in 1989. Since the start of this series of Conferences the research fields under consideration have evolved quite a lot. The number of scientific papers on Clifford Algebra, Clifford Analysis and their impact on the modelling of physics phenomena have increased tremendously and several new books on these topics were published. We were very pleased to see old friends back and to welcome new guests who by their inspiring talks contributed fundamentally to tracing new paths for the future development of this research area. The Conference was organized in Deinze, a small rural town in the vicinity of the University town Gent. It was hosted by De Ceder, a vacation and seminar center in a green area, a typical landscape of Flanders's plains. The Conference was attended by 61 participants coming from 18 countries; there were 10 main talks, on invitation 37 contributions accepted by the Organizing Committee and a poster session. There was also a book display of Kluwer Academic Publishers. As in the Proceedings of the Canterbury and Montpellier conferences we have grouped the papers accordingly to the themes they are related to: Clifford Algebra, Clifford Analysis, Classical Mechanics, Mathematical Physics and Physics Models. Academic and Professional Discourse Genres in Spanish Giovanni Parodi, 2010. Parodi and his collaborators in this inspiring volume provide an insightful model for the analysis of construction, interpretation and use of academic and professional genres. Vijay K. Bhatia, City University of Hong Kong. Book Jacket *Designing Interactive Speech Systems* Niels O. Bernsen, Hans Dybkjaer, Laila Dybkjaer, 2012-12-06. *Designing Interactive Speech Systems* describes the design and implementation of spoken language dialogue within the context of SLDS (spoken language dialogue systems) development. Using an applications-oriented SLDS developed through the Danish Dialogue project, the authors describe the complete process involved in designing such a system and in doing so present several innovative practical tools such as dialogue design guidelines, in-depth evaluation methodologies and speech functionality analysis. The approach taken is firmly applications-oriented, describing the results of research applicable to industry and showing how the development of advanced applications drives research rather than the other way around. All those working on the research and development of spoken language services, especially in the area of telecommunications, will benefit from reading this book.
