Hamburg's Entrepreneurial Ecosystem And The Next Media Initiative Moritz Philip Recke, 2019-02-26 Entrepreneurship more specifically the formation of tech startups is often attributed with economic growth and job creation due to their high growth potential by many policy makers around the world This link is widely debated in scientific literature which does not necessarily seem to inform public policy The City of Hamburg established a Next Media Initiative focusing on media and IT industry related innovation to nurture the future development of this industry cluster with the help of high growth ventures This master thesis explores the composition of Hamburg's entrepreneurial ecosystem local government efforts to facilitate its development and the disconnect between municipal innovation policy and academic literature

Egypt of Yesterday and To-day Percy Withers, 1909

The Politics of Late Urban Entrepreneurialism Greig Charnock, Jose Mansilla, Ramon Ribera-Fumaz, 2025-11-19 The Politics of Late Urban Entrepreneurialism provides a critical examination of how innovation district transformation in Barcelona has led to periodic crisis and an overproduction of commercial real estate alongside a chronic housing shortage gentrification touristification and a growth in low quality employment among other damaging results Today innovation districts are widely seen as a disruptive but generative solution to post industrial decline and inefficient land use in urban centres and as an effective means of bringing inclusive economic dynamism quality jobs and improved public spaces to city neighbourhoods Their advocates often point to the pioneering transformation of the 22 District This book challenges the celebratory discourse surrounding the Barcelona case and with a critical eye on how innovation district transformation is conditioned by the prevailing global political economic context It also chronicles how this transformation has continually ignited forms of class based struggle in Barcelona by embattled residents angered at how their own neighbourhood has been used as an urban laboratory and site for speculative forms of capital accumulation Ultimately this book challenges the notion that innovation is always a beneficent force through a critical examination of the disruptive consequences of innovation district transformation by engaging with existing literature and interrogating the dominant narratives that celebrate them as being universally beneficial Instead it underscores the tensions and contradictions inherent in them With its focus on the historical development of global capitalism and the retention of a narrow repertoire of entrepreneurial approaches towards urban governance The Politics of Late Urban Entrepreneurialism will be of great interest to scholars and students researching globalisation and urbanisation
