A Unique Life at Sea Captain Peter Skog, 2019-08-30 It was a hot fine day in the middle of November 2003 in the very upper part of the mighty Amazon River in Iquitos Peru where I ended up living for 15 years when I started to write on this autobiography realizing that my life at sea had been extremely special in every aspect ever since I started at sea 1963 as a barely 16 year young teenager facing some weird events that would shape me for the rest of my future life at sea and I was longing to see the real world before I die Though I was not a writer the idea of writing this book emerged in a moment of great sadness in February 2002 In Antarctica when I started to think about how it could be that I was commanding the 2398 ton The World's First Expedition Cruise Ship MS Explorer Lindblad Explorer the Ship in The Wilderness and my destination was the Prince Gustav Sound in the Weddell Sea east of the Antarctic Peninsula in the Antarctic wilderness when one of my passengers standing behind my back suddenly said This is really going to make the boys back at the golf club jealous To write about my own experiences feels kind of strange and from the start I knew that I was incapable of producing a strict biography of all the stunning account of adventures I have had and discoveries we made in those years onboard the Lindblad Explorer in the early 70's as well as on the Explorer Understanding the Psychic Powers of Man (Revised Edition) Jaime T. Licauco, 2017-12-02 A product of Jaime Licauco's knowledge about psychic and paranormal matters a summary of the most significant lessons he had learned from years of reading and research as well as true to life experiences of people who shared their psychic stories with him It is the first book of its kind written by a Filipino author and has become a classic in the field since it first came out in commercial book form in 1978 Although the flavor of the original edition was retained the new edition contains a great deal of new theories and findings on neuroscience and parapsychology *Three German Women* Erika Esau, 2021-05-11 This book presents the life stories of three women of the German speaking realm whose lives inspired the author directly mathematician Maria Weber Steinberg 1919 2013 journalist Irmgard Rexroth Kern 1907 1983 and Viennese art historian Fr Dr Anna von Spitzmüller 1903 2001 The lives of these three women serve as emotional mirrors to the cultural transformations and tumultuous history of the 20th century Their stories tell of the hardships struggles and victories of intellectual European women in this era Each woman was related to men who played a prominent role in European cultural life men who received some recognition in history books As intellectual professionals these women in contrast received very few public accolades for their important achievements Placing them in the cultural context of the times in Germany and Austria the book highlights the traumatic choices imposed on ordinary people by political and social circumstances over which they had no control Along with the women's individual stories the chapters focus on overarching themes including educated women's roles in European society narratives of perseverance in confronting Nazism and specific historical background describing the incidents affecting their life trajectories **A History of Medicine in 50 Discoveries (History in 50)** Marguerite Vigliani, Gale Eaton, Phillip Hoose, 2017-06-27 Vigliani and Eaton's high interest exploration of

Explains how emotion is key to understanding out of body experience apparitions and other anomalous perceptions Contemporary science holds that the brain rules the body and generates all our feelings and perceptions Michael Jawer and Dr Marc Micozzi disagree They contend that it is our feelings that underlie our conscious selves and determine what we think and how we conduct our lives The less consciousness we have of our emotional being the more physical disturbances we are likely to have from ailments such as migraines fibromyalgia chronic fatigue and post traumatic stress to anomalous perceptions such as apparitions and involuntary out of body experiences Using the latest scientific research on immunity sensation stress cognition and emotional expression the authors demonstrate that the way we process our feelings provides a key to who is most likely to experience these phenomena and why They explain that emotion is a portal into the world of extraordinary perception and they provide the studies that validate the science behind telepathic dreams poltergeists and ESP The Spiritual Anatomy of Emotion challenges the prevailing belief that the brain must necessarily rule the body Far from being by products of neurochemistry the authors show that emotions are the key vehicle by which we can understand ourselves and our interactions with the world around us as well as our most intriguing and perennially baffling experiences
