Macroeconomics ; Australasian Edition Olivier Blanchard, Jeffrey Sheen, 2013-05-30 Real current macroeconomic events connected to the theory The new fourth edition of Blanchard's respected Macroeconomics text has been substantially revised to account for the impact of the GFC on the Australasian Economy and the many issues it raises Thus in addition to a first discussion of the crisis in Chapter 1 and numerous boxes and discussions throughout the book we have brought forward the chapter on the GFC to Chapter 9 Macroeconomics is the only intermediate resource with a truly Australasian focus demonstrating economic ideas and issues with hundreds of local and international examples This comprehensive resource presents an integrated view of macroeconomics drawing on the implications of equilibrium conditions in three sets of markets the goods market the financial markets and the labour market *Income Inequality* Matthew P.

Drennan, 2015-11-24 Prevailing economic theory attributes the 2008 crash and the Great Recession that followed to low interest rates relaxed borrowing standards and the housing price bubble After careful analyses of statistical evidence however Matthew Drennan discovered that income inequality was the decisive factor behind the crisis Pressured to keep up consumption in the face of flat or declining incomes Americans leveraged their home equity to take on excessive debt The collapse of the housing market left this debt unsupported causing a domino effect throughout the economy Drennan also found startling similarities in consumer behavior in the years leading to both the Great Depression and the Great Recession Offering an economic explanation of a phenomenon described by prominent observers including Thomas Piketty Jacob Hacker Robert Kuttner Paul Krugman and Joseph Stiglitz Drennan's evenhanded analysis disproves dominant theories of consumption and draws much needed attention to the persisting problem of income inequality **Feminism Confronts**

Homo Economicus Martha Fineman, Terence Dougherty, 2018-08-06 The essays in this volume confront the inroads that economics has made into the legal academy Law and Economics uses principles of neoclassical economics to develop laws and social policies that maintain if not bolster current allocations of power from the Introduction The Law and Economics school has had a significant impact on the legal and governmental landscape in the United States It posits a perfectly rational economic man homo economicus who is unconstrained by familial and communal ties and who can and should make decisions solely in light of considerations of economic value Feminism Confronts Homo Economicus offers a major intervention in debates about how law has come under the influence of economic principles Drawing on the latest thinking in the fields of feminist legal theory critical legal studies and feminist economics the essays critique the notion that legal and policy decisions should be made solely through the lens of economics While the contributors question the wholesale incorporation of the neoclassical economic model into legal analysis they do not all discard economic analysis and theory Situated at the intersection of feminism law and economics Feminism Confronts Homo Economicus will appeal to scholars and students of these disciplines as well as policy analysts and social theorists interested in family education labor and welfare Law and Macroeconomics Yair Listokin, 2019-03-11 After 2008 private sector spending took a decade to recover

Yair Listokin thinks we can respond more quickly to the next meltdown by reviving and refashioning a policy approach used in the New Deal to harness law's ability to function as a macroeconomic tool stimulating or relieving demand as required under certain crisis conditions
