Crossroads Scott A. Snyder,2018-01-02 Against the backdrop of China s mounting influence and North Korea s growing nuclear capability and expanding missile arsenal South Korea faces a set of strategic choices that will shape its economic prospects and national security In South Korea at the Crossroads Scott A Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions and a prescription for the future Pairing a historical perspective with a shrewd understanding of today s political landscape Snyder contends that South Korea s best strategy remains investing in a robust alliance with the United States Snyder begins with South Korea s effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s A series of shifts in South Korean foreign relations followed the Nordpolitik engagement with the Soviet Union and China at the end of the Cold War Kim Dae Jung s Sunshine Policy designed to bring North Korea into the international community trustpolitik which sought to foster diplomacy with North Korea and Japan and changes in South Korea s relationship with the United States Despite its rise as a leader in international financial development and climate change forums South Korea will likely still

require the commitment of the United States to guarantee its security Although China is a tempting option Snyder argues that only the United States is both credible and capable in this role South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power and it must balance the contradiction of desirable autonomy and necessary alliance

Culture Shock for Asians in U.S. Academia Eunkyong Lee Yook, 2013-11-26 Culture Shock for Asians in U S Academia Breaking the Model Minority Myth discusses the unique cultural challenges that Asians face in U S academia The issues facing Asians in academia are worthy of our attention for two major reasons the numerical significance of Asians in U S academia and the fact that their problem has been largely eclipsed due to their visible success and status as model minority Asian immigrants are often called the model minority because of their Confucianist work ethic and emphasis on ye or social order as well as the high value placed on education Additionally Asians generally have often been stereotyped as excelling in academics However they face serious problems in adjusting to the U S academic system These problems are due to cultural patterns and variables that are largely invisible yet nonetheless have an undeniable impact on academics The issues that affect students ranging from kindergarten through graduate school and that also affect scholars in academic careers beyond the formative process are reviewed systematically in this book Analysis of issues is based on intercultural communication theories and suggestions for overcoming these challenges are suggested Becoming aware of and addressing the roadblocks for Asians is important not only for Asian students and scholars but also for educators education administrators and institutions Additionally helping Asians to overcome the challenges in academia not only helps academia to become a more inclusive place where all students can learn and all scholars can work in academia successfully it also benefits society by producing a more literate educated and qualified workforce overall By promoting understanding of this important topic in a systematic and theoretic fashion valuable resources can be realized to their full potential

Made in Korea Richard M. Steers,2013-08-21 American business folklore is awash with the adventures of successful entrepreneurs Still most of these stories are about Americans neglecting important and courageous entrepreneurs from other countries Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world s largest and most successful building empires Hyundai through a combination of creative thinking tenacity timing political skills and a business strategy that few competitors ever understood Chung entered the shipbuilding business with no experience and went on to create the world s largest shipyard He began making automobiles when foreign experts unanimously predicted he would fail and he started a global construction company that has built some of today s greatest architectural wonders He even convinced the International Olympic Committee to select South Korea over Japan as the site

for the highly successful 1988 Olympics Unlike most CEO s of major firms Chung has always preferred the company of his workers to that of the global executive elite Hard work creativity and a capacity to never give up this is the essence of Chung s life In each of his ventures he exhibited a sheer determination to succeed regardless of the obstacles and he worked tirelessly to instil this drive in all of his employees Even today in the midst of Korea s worst economic crisis in over four decades Chung s company is busy implementing plans to emerge as an even stronger contender in the world economy Illustrated with 32 pages of colour photographs not previously seen in the West including photos of Chung s recent historic visit to North Korea in 1998 Made in Korea takes stock of Chung s entire life highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs *Política externa* ,2007 **Steel Odyssey** Ohjoon KWON,JOO Choi,Hae-Geon LEE,2024-07-15 In this wide ranging interdisciplinary work the authors draw on history anthropology and materials engineering to present a comprehensive and ambitious examination of the multifaceted roles of iron and steel throughout history and the current and future challenges faced by the steel industry Ohjoon Kwon Joo Choi and Hae Geon Lee provide readers with an in depth understanding of the history of iron and steel and their impact on human society from a materials engineering perspective They begin by describing the characteristics of iron and steel and the history of human use of and interaction with these metals by compiling the fundamental knowledge necessary to understand iron s unique properties and metallurgical phenomena Following this they explain the influence of steel on human society and culture focusing on Industrial Revolution and warfare They also give examples that are rarely discussed elsewhere such as developments in Asia or iron s influence on thought and philosophy using Confucianism and Marxism as examples Readers will then be able to apply this contextual knowledge to address the profound impact of emerging challenges such as global environmental issues and the Fourth Industrial Revolution Despite the technical nature of this book all terminology is fully explained to facilitate better comprehension for those who may not possess an engineering education or a direct interest in metallurgy This book is therefore invaluable not only as a technical book but also as a guide to the development history of human civilization and its future challenges **Flowers of Fire** Hawon Jung,2023-03-07 Listed in the best books of 2023 by The Economist Invigorating debut a full throated rallying cry Publishers Weekly One of Ms Magazine s most anticipated feminist books of 2023 An eye opening firsthand account of the ongoing and trailblazing feminist movement in South Korea one that the world should be watching Since the beginning of the MeToo movement tens of thousands of people in South Korea have taken to the street and many more brave individuals took a stand to end a decades long abortion ban and bring down powerful men accused of sexual misconduct including a popular presidential contender South Korean feminists know that the revolution has been a long time coming between battles against its own patriarchal society as well as challenging stereotypes of docile Asian women in the Western imagination Now author Hawon Jung will show the rest of the world that these women are no delicate flowers they are trailblazing flames Flowers of Fire takes the reader into the trenches of this

fight for equality following along as South Korean activists march on the streets navigate public and private spaces where spycam porn crimes are rampant and share tips and tricks with each other as they learn how to protect themselves from harassment and how to push authorities to act Jung the former Seoul correspondent for the AFP draws on her on the ground reporting and interviews with many women who became activists and leaders from the elite prosecutor who ignited the country's MeToo movement to the young women who led the war against non consensual photography Their stories though long overlooked in the West mirror realities that women across the world are all too familiar with threats of defamation lawsuits to silence victims of assault tech based sexual abuse and criminal justice systems where victims voices are often met with suspicion and abusers downfalls are met with sympathy These are the issues at the heart of their MeToo movement and South Korean women have fought against them vigorously and with extraordinary success In Flowers of Fire Jung illuminates the strength and tenacity of these women too often sidelined in global conversations about feminism and gender equality
