Science and society in southern Africa Saul Dubow,2017-03-01 This collection dealing with case studies drawn from South Africa Zimbabwe Mozambique and Mauritius examines the relationship between scientific claims and practices and the exercise of colonial power It challenges conventional views that portray science as a detached mode of reasoning with the capacity to confer benefits in a more or less even handed manner That science has the potential to further the collective good is not fundamentally at issue but science can also be seen as complicit in processes of colonial domination Not only did science assist in bolstering aspects of colonial power and exploitation it also possessed a significant ideological component it offered a means of legitimating colonial authority by counter poisoning Western rationality to native superstition and it served to enhance the self image of colonial or settler elites in important respects This innovative volume ranges broadly through topics such as statistics medicine eugenics agriculture entomology and botany *R.D. Laing: His Work and its Relevance for Sociology (RLE Social Theory)* Martin Howarth-Williams,2014-08-07 This study by a sociologist provides the most rigorous and comprehensive review to appear so far of R D Laing's work and theoretical development Martin Howarth Williams considers that Laing's insights into such controversial issues as the divided self and the politics of the family are of an importance that transcends their basis in clinical psychiatry and that they have a special significance for sociology Using the Progressive Regressive Method of Jean Paul Sartre the author illuminates the internal coherence of Laing's aims through the various stages of his work and shows how his ideas are shaped by consistent philosophic presuppositions and influences underlying his work To give as complete an account as possible of Laing's interests and to relate them to the broad stream of his thought the author explores Laing's involvement in other non psychiatric realms especially politics religion and eastern mysticism Material has been secured from a wide variety of recent sources which include interviews films TV appearances and the author's own personal recollections of informal talks given by Laing In the final section of the book Martin Howarth Williams isolates the concept of Intelligibility which he demonstrates to be the unifying theme central to Laing's theory and shows how this can be used as the basis for a critique of recent developments in sociological theory as well as a starting point towards a genuinely dialectical sociology *Chaosophy, New Edition* Felix Guattari,2008-11-14 The texts and interviews collected in Chaosophy were written in the wake of May 68 They elaborate on the groundbreaking theories of capitalism and schizophrenia that Felix Guattari introduced with Gilles Deleuze in *Anti Oedipus* in 1972 one of the most important books of our time Boldly rewriting Marx's vision of capitalism in terms of schizophrenic flows Guattari substituted the Freudian interpretation of neurosis with the model of schizoanalysis advocating a more pragmatic experimental and collective approach to mental phenomena that opened the way to a micropolitical subversion of the capitalist system BOOK

Grace, Nirmala Erevelles, 2023-03-31 This edited book makes an epistemic claim that disability studies approaches to curriculum are doing more than merely critiquing how privileged knowledge excludes disability from curriculum theory and praxis The scholars in this volume argue instead that Disability Studies embodies an epistemic space that not only demonstrates its difference from the normative curriculum it exceeds curriculum s confining boundaries Thus they argue for a curriculum about curriculum one that critically investigates the epistemological ontological and pedagogical claims of the normative curriculum from the critical standpoint of disability Conceptualizing curriculum as cultural politics each chapter offers a theorization of disability via a critical intersectional lens that addresses the following questions What are the epistemological barriers possibilities encountered when disability is brought into the intellectual ambit of curriculum theory What would curriculum theory look like if disabled people re imagined the curriculum What is the link between curriculum and conceptions of specialized programming for students identified as disabled And most critically how do approaches to schooling and conceptions of ability within curriculum studies enact forms of racism sexism and heteronormativity as well as are complicit in the construction and removal of the disabled body from mainstream education This book was originally published as a special issue of the journal Curriculum Inquiry
