War Diaries Elisa Dainese, Aleksandar Stanicic, 2022-03-31 In recent decades the development of advanced weaponry systems and the instant flow of information have redefined the notion of urban warfare as a local phenomenon with global effects in an increasingly interconnected world The annihilation of Aleppo and the broadcasted demolitions of Palmyra demonstrate the accelerating politicization of the

destruction process In this timely volume Elisa Dainese Aleksandar Stani i and a broad range of contributors explore the weaponization of architecture targeted attacks on art and infrastructure meant to destroy not only physical structures but also political unity and cultural memory Focusing on regions where planners architects and artists are involved in concrete initiatives on the ground War Diaries looks at complex postwar settings to illuminate design responses to urban warfare and violence against the built environment The essays discuss creative strategies for rebuilding and restablizing damaged sites often within the context of continuing animosities the establishment of design coalitions to work with local communities on reconstruction the designing of emergency settlements the development of new and customized strategies for rebuilding diverse parts of the ravaged world and the teaching of culturally sensitive design practices to architects and urbanists among many other topics A much needed contribution to our understanding of postconflict design this volume maps the creative approaches that specialists have used to remediate the effects of violence against cities and cultural heritage *Planning Sustainable Cities* Spiro N. Pollalis, 2016-05-20 Planning Sustainable Cities An infrastructure based approach provides an analytical framework for urban sustainability focusing on the services and performance of infrastructure systems The book approaches infrastructure as a series of systems that function in synergy and are directly linked with urban planning This method streamlines and guides the planning process while still highlighting detail each infrastructure system is decoded in four system levels The levels organize the processes highlight connections between entities and decode the high level planning and decision making process affecting infrastructure For each system level strategic objectives of planning are determined The objectives correspond to the five focus areas of the Zofnass program Quality of life Natural World Climate and Risk Resource Allocation Leadership Developed through the Zofnass Program at the Harvard Graduate School of Design this approach integrates the key infrastructure systems of Energy Landscape Transportation Waste Water Information and Food and explores their synergies through land use planning engineering economics and policy The size and complexity of infrastructure systems means that multiple stakeholders facing their own challenges and agendas are involved in planning this book creates a common collaborative platform between public authorities planners and engineers It is an essential resource for those seeking Envision Sustainability Professionals accreditation **America's Inequality Trap** Nathan J. Kelly, 2020-02-11 The gap between the rich and the poor has grown dramatically in the United States and is now at its widest since at least the early 1900s While by most measures the economy has been improving soaring cost of living and stagnant wages have done little to assuage economic anxieties Conditions like these seem designed to produce a generation defining intervention to balance the economic scales and enhance opportunities for those at the middle and bottom of the country s economic ladder but we have seen nothing of the sort Nathan J Kelly argues that a key reason for this is that rising concentrations of wealth create a politics that makes reducing economic inequality more difficult Kelly convincingly shows that when a small fraction of the people control most of the economic resources they also hold a disproportionate amount of

political power hurtling us toward a self-perpetuating plutocracy or an inequality trap. Among other things, the rich support a broad political campaign that convinces voters that policies to reduce inequality are unwise and not in the average voter's interest regardless of the real economic impact. They also take advantage of interest groups they generously support to influence Congress and the president as well as state governments in ways that stop or slow down reform. One of the key implications of this book is that social policies designed to combat inequality should work hand in hand with political reforms that enhance democratic governance and efforts to fight racism, and a coordinated effort on all of these fronts will be needed to reverse the decades-long trend.

Maintenance Organization and Systems Anthony Kelly, 1997-09-08. The profitability of any industry in any technological sector—power, process manufacturing, mineral extraction, transport, communication, etc.—will be profoundly influenced by the reliability and performance of the plant which it uses. It is therefore vital that all possible measures are taken to maximise the productivity in use and to minimise the maintenance costs and the downtime of that plant. This book explains in a clear and concise manner the various organization structures that are needed for doing just that: the information systems with which those structures will need to be resourced and the steps that will have to be taken in order to bring those structures and systems into being. The author, Anthony Kelly, an experienced international consultant and lecturer on this subject, calls his approach BUSINESS CENTRED MAINTENANCE (BCM) because it springs from and is driven by the identification of business objectives which are then translated into maintenance objectives and which underpin the maintenance strategy formulation. For the first time, maintenance management is analysed from the perspective of the whole company and thus makes sense not only technologically but also in economic and business terms. Complete guide to maintenance from a whole company perspective. Best selling and world renowned author. Complementary to RCM. Moubray TPM. Wilmott.
