## **Making A Good Script Great Linda Seger:**

**Making a Good Script Great** Linda Seger, 2010 Making a good script great is more than just a matter of putting a good idea on paper. It requires the working and reworking of that idea. Making a Good Script Great takes you through the whole screenwriting process from initial concept through final rewrite providing specific methods that will help you craft tighter, stronger and more salable scripts. While retaining the invaluable insights that placed its first two editions among the all-time most popular screenwriting books, this expanded, revised and updated third edition adds rich and important new material on dialogue, cinematic images and point of view as well as an interview with screenwriter Paul Haggis. If you're writing your first script, this book will help develop your skills for telling a compelling and dramatic story. If you're a veteran screenwriter, it will help you articulate the skills you know intuitively. And if you're currently stuck on a rewrite, this book will help you analyze and solve your script's problems and get it back on track. Book jacket

**Digital Storytelling** Shilo T. McClean,2008-09-26 How digital visual effects in film can be used to support storytelling a guide for scriptwriters and students Computer generated effects are often blamed for bad Hollywood movies Yet when a critic complains that technology swamps storytelling in a review of Van Helsing calling it an example of everything that is wrong with Hollywood computer generated effects movies it says more about the weakness of the story than the strength of the technology In Digital Storytelling Shilo McClean shows how digital visual effects can be a tool of storytelling in film

adding narrative power as do sound color and experimental camera angles other innovative film technologies that were once criticized for being distractions from the story It is time she says to rethink the function of digital visual effects Effects artists say contrary to the critics that effects always derive from story Digital effects are a part of production not post production they are becoming part of the story development process Digital Storytelling is grounded in filmmaking the scriptwriting process in particular McClean considers crucial questions about digital visual effects whether they undermine classical storytelling structure if they always call attention to themselves whether their use is limited to certain genres and looks at contemporary films including a chapter long analysis of Steven Spielberg s use of computer generated effects and contemporary film theory to find the answers McClean argues that to consider digital visual effects as simply contributing the wow factor underestimates them They are she writes the legitimate inheritors of film storycraft

**Life Or Movie** Mickael L. Rozwarski,2002 Life or movie Which comes first is a glimpse into an aspiring screenwriter s mind as he tries to figure out the inner workings of high concept movies The author starts out with the premise that there are very easy rules that govern storytelling rules which are universal and tolerate no exceptions That is how he was led to discard traditional perspectives of movie analysis one after the other Field Campbell Jung Freud which all proved to be unfaithful to observable facts The author proposes then a change of paradigm and a different look at storytelling fiction is like magic you cannot explain it or it will break the spell ruin the magic But when you think about it there are no two rational ways of making a rabbit appear from a hat
