Management Of Convergence In Innovation Strategies And Capabilities For Value Creation Beyond Blurring Industry Boundaries Contributions To Management Science:

Management of Convergence in Innovation Fredrik Hacklin, 2007-10-15 Driven by the fascination about dramatic structural and competitive changes within telecommunication and information technology in industries during the past decade the convergence phenomenon has increasingly gained my personal attention throughout my work and studies Therefore not entirely coincidentally this book was written as the result of my doctoral research at ETH Zurich which turned out to be a challenging yet highly rewarding endeavor However this work would not have been possible without the enduring support of several people First I would like to express my gratitude to my thesis supervisor Prof Fritz Fahrni for providing me with the opportunity to conduct exciting research projects in close collaboration with industry and for supporting me with solid guidance and advice all the way Also I would like to thank Dr Christian Marxt for urging me to pursue the chosen line of enquiry as well as for his devoted coaching both at ETH and at Stanford both within and beyond of office hours Furthermore I am grateful to Prof Georg von Krogh for his encouraging feedback and valuable comments during various inspiring discussions

Developing Holistic Strategic Management In The Advanced Ict Era Mitsuru Kodama, 2019-09-19 From the lens of holistic systems theory this book discusses strategic management adapted to evolving convergence in an era of advanced ICT from the viewpoint of the major management elements of strategy organizations technologies operations and leadership To discuss corporate change in response to such advanced technology in a theoretical and empirical manner it is necessary not only to analyze and consider individual management elements such as strategy organizations technologies operations and leadership in a piecemeal manner but also to determine the research issues from a framework based on a holistic management perspective through systems theory including interaction between and among the respective individual management elements from micro to macro elements Applying both innovation theory and capabilities theory this book presents a new framework and knowledge for holistic strategic management from a systems theory lens that focuses on the issue of how major corporations can develop capabilities to achieve strategic innovation in response to the impacts of advanced ICT on corporate management

The Anticipation of Converging Industries Clive Steven Curran, 2013-06-13 The blurring of boundaries between hitherto distinct scientific disciplines technologies or markets is a common and powerful phenomenon Subjects of this convergence often change consumer behaviours favouring products and platforms with multiple functions The Anticipation of Converging Industries provides a detailed focus on the triggers drivers and consequences of convergence to create a more concise definition of convergence This detailed analysis includes a specifically developed toolbox for convergence foresight creating a forecasting method for convergence trends With the focus on the chemical biotechnological and pharmaceutical industries several indicators of convergence in the areas of Nutraceuticals Functional Foods Cosmeceuticals and ICT are derived from samples including over 1 million patents and scientific publications By

Management of Convergence in Innovation Fredrik Hacklin,2007

Profiting from external knowledge

Maarten Batterink, 2023-08-28 Innovation managers and innovation scholars increasingly emphasize the open innovation model introduced by Henry Chesbrough in 2003. This model postulates that the innovation process should be flexible and cross organizational boundaries which enables the transfer of knowledge and capabilities between organizations. However, until now it remained unclear which types of firms apply open innovation, whether it really raises their performance, and how this can be managed in the best way. This book addresses the important issue how innovative firms profit from external knowledge to improve their innovation performance. Using large scale empirical evidence from the Dutch industry, this book shows that especially Small and Medium sized Enterprises (SMEs) and firms from low tech sectors have increasingly adopted open innovation strategies over the period 1994-2004 and are clearly catching up large and high tech firms. The results indicate that firms pursuing an open innovation strategy perform better with regard to innovation than firms that innovate exclusively in house. In contrast to the common opinion that large Mergers Acquisitions (MAs) are bad for innovation, it turns out that MAs have a positive impact on long term innovation performance. In times of economic crisis, this can be an extra argument for governments to back large scale MAs. Large medium high tech MAs in the life sciences industry were analysed in depth to investigate the dynamics of post MA integration. This book shows the different types of innovation synergies that can be expected from MAs and how they can be realized by systematic post MA integration. Finally, this book studies how innovation brokers fulfill essential roles in innovation networks of SMEs in the agri food sector. It provides guidelines for managers in innovation networks to improve the performance of these networks.

The Co-Creation Paradigm Venkat Ramaswamy, Kerimcan Ozcan, 2014-04-09 A fundamental shift is underway that will change how we conceive of value. In an era of increasing interconnectedness, individuals as opposed to institutions stand at the center of value creation. To adapt to this tectonic shift, organizations can no longer unilaterally devise products and services. They must engage stakeholders from customers and employees to suppliers, partners, and citizens at large as co-creators. Co-creation guru Venkat Ramaswamy and Kerimcan Ozcan call for enterprises to be mindful of lived experiences to build engagement platforms and management systems that are designed for creative collaboration and to develop win-win strategies that enhance our wealth, welfare, and well-being. Richly illustrated with examples of co-creation in action, **The Co-Creation Paradigm** provides a blueprint for the co-creative enterprise economy and society while presenting a conceptual framework that will guide organizations across sectors in adopting this transformational approach. Challenging some of our most deeply held ideas about business and value, this book outlines the future of business as usual.
