

Chapter 10 Notes (2AB3 Managerial Accounting I)

Budget:

is a formal written statement in financial terms of management's plans for a specified future time period.

- it is the primary method of communicating agreed-upon objectives throughout the organization.
- Accountants translate management's plans and communicate the budget to employees throughout the company.

Benefits of budgeting:

1. It requires all levels of management to **plan ahead** and to formalize goals on a recurring basis.
2. It provides **definite objectives** for evaluating performance at each level of responsibility.
3. It creates an **early warning system** for potential problems so that management can make changes before things get out of control.
4. It makes it easier to **coordinate activities** within the business. It does this by fitting the goals of each segment with overall company objectives. Thus, production and sales promotion can be integrated with expected sales.
5. It results in greater **management awareness** of the entity's overall operations and the impact on operations of external factors, such as economic trends.
6. It **motivates personnel** throughout the organization to meet planned objectives.

Essentials of effective Budgeting:

The effectiveness of a budget program is directly related to how well it is accepted by all levels of management.

Sales forecast:

This projection of potential sales for the industry and the company's expected share of these sales.

Sales forecasting involves a consideration of various factors:

1. general economic conditions,

Management thinking at the Faculty of Economics of the University of Coimbra FEUC has followed these trends enabling students with the essential skills supporting the practice of the profession both in business and public sector organisations. This book features topical trends of research in Management studies in which FEUC professors are involved together with international peers evidencing the openness of the Faculty to the world. Numerous of the subjects addressed relate to challenges that organisations are already facing or will have to deal with shortly. Therefore the book not only presents innovative research questions but it also delivers a practical perspective. Thus organisations will certainly find here some support to better manage those issues in practice.

Management Accounting and Control Michel Charifzadeh, Andreas Taschner, 2017-10-30

Management accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time business in general and management accounting in particular is becoming more and more international. English clearly has evolved as the lingua franca of international business. Academics students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for management accounting and control. Management Accounting is becoming more and more international.

Management Accounting and Control is a new textbook in English covering concepts and instruments of management accounting at an introductory level primarily at the Bachelor level but also suited for general management and MBA courses due to a strong focus on practical relevance. This textbook covers all topics that are relevant in management accounting in business organizations that are typically covered in German and Central European Bachelor courses on management accounting and control. After a general introduction to the field of management accounting and control, the book discusses cost management as an extension of cost accounting. Typical cost management instruments such as target costing, life cycle costing and process based costing approaches are explained in detail. Differences between Anglo American activity based costing ABC and German process based costing are highlighted. The book then turns to an extensive discussion of planning and budgeting tasks in management accounting with a strong focus on the practical application of the topic such as developing a budget in practice. Another chapter is dedicated to a comparison of traditional budgeting with modern alternative budgeting approaches. A major part of the book is dedicated to the broad area of performance management. The relevance of financial statement information for performance management purposes is discussed in detail. In addition, the most widely spread financial performance indicators are illustrated using real world examples. The book also includes detailed content on value based management control concepts. In a consecutive chapter, performance measurement is linked with strategy while extensively discussing the Balanced Scorecard as a key tool in strategic performance management. The remaining parts of the book deal with management reporting as one of the main operative tasks in management accounting practice. The book closes with insight into new fields and developments that currently influence management accounting.
