

Managerial Accounting

Chapter 5

5.1 - Cost Behavior Patterns

The three types of cost behavior:

- **Variable costs**
 - Describes costs that vary *in total* with changes in volume of activity
 - Direct materials, direct labor, indirect labor, energy costs, etc
 - DM and DL are the most common variable costs.
 - *Total variable costs* change with changes in activity, but *per unit variable cost* remains the same with changes in activity.
- **Fixed costs**
 - Describes costs that are fixed (doesn't change) in total with changes in volume of activity
 - Building rent, insurance, etc
 - *Total fixed costs* do not change with changes in activity, but *per unit fixed cost* does change with changes in activity.
- **Mixed costs**
 - Describes costs that has a mixture of fixed and variable costs
 - Compensation with monthly salary and commission based on sales, etc
 - *Mixed costs* change with changes in activity, and *per unit mixed cost* also changes with changes in activity.

Managers need to understand how costs behave to predict what will happen to *profit* in the *future*.
