Defence Offsets and the Global Arms Trade Jonata Anicetti, 2024-02-06 This book offers the first comprehensive study of defence offsets and its economic security political and theoretical implications Originating in the second half of the 19th century defence offsets additional economic industrial and technological benefits to states for buying foreign weapons have since been a key feature of the global arms trade and defence industry And yet offsets are an under researched and under theorised phenomenon This book fills this gap in the literature by offering the first general theory of defence offsets as well as the first systematic analysis of the offset phenomenon By building on the insights of scholars of defence economics and drawing from the International Relations liberal paradigm as well as reviving and adapting Robert Putnam s two level game framework the book proposes a liberal rationalist theory of defence offsets It then proves the worth of such a theory through Qualitative Comparative Analysis QCA of fifty four fighter aircraft transfers from 1992 to 2021 inclusive and three in depth case studies addressing offsets negotiated and agreed to as part of fighter aircraft competitions in Brazil India and South Korea This book will be of interest to students of defence studies defence economics security studies and international relations

The future of U.S.-India security cooperation Šumit Ganguly, M. Chris Mason, 2021-03-30 This book deals with the evolution current status and potential of U S India strategic cooperation From very modest beginnings the U S India strategic partnership has developed significantly over the last decade In considerable part this growth has stemmed from overlapping concerns about the rise and assertiveness of the People s Republic of China as well as the instability of Pakistan Despite the emergence of this partnership significant differences remain some of which stem from Cold War legacies others from divergent global strategic interests and institutional design In spite of these areas of discord the overall trajectory of the relationship appears promising Increased cooperation and closer policy coordination underscore a deepening of the relationship while fundamental differences in national approaches to strategic challenges demand flexibility and compromise in the future
