Financial Innovation and Engineering in Islamic Finance Samir Alamad, 2017-04-13 This book provides two important contributions to existing

theories in the financial innovation literature First it extends the existing literature of innovation orientation to a completely new field and construct that is based on a religious imperative as a framework within which financial innovation is constrained It explains how an innovation orientation in IFIs can be directed within religious rules which indicates that innovation orientation in IFIs is a learning philosophy Second the book introduces and examines the plasticity of Shariah as a shared boundary object and its dynamic role in managing tension and conflicting values in the financial innovation process Furthermore building on the empirical results the study illustrates the insights that each theoretical lens affords into practices of collaboration and develops a novel analytical framework for understanding religious orientation towards financial innovation This practical contribution of the developed framework could form the basis for a standardised framework for the Islamic finance industry The book concludes by noting the policy and managerial implications of its findings and provides directions for further research

Emerging Issues in Islamic Finance Law and Practice in Malaysia Umar A. Oseni, M. Kabir Hassan, Rusni Hassan, 2019-08-26 Through a thorough analysis of emerging legal and regulatory issues in Islamic finance law and practice in Malaysia this exciting new study covers issues such as blockchain technology anti money laundering and FinTech in Islamic finance

Machine Learning in Finance Matthew F. Dixon, Igor Halperin, Paul Bilokon, 2020-07-01 This book introduces machine learning methods in finance It presents a unified treatment of machine learning and various statistical and computational disciplines in quantitative finance such as financial econometrics and discrete time stochastic control with an emphasis on how theory and hypothesis tests inform the choice of algorithm for financial data modeling and decision making With the trend towards increasing computational resources and larger datasets machine learning has grown into an important skillset for the finance industry This book is written for advanced graduate students and academics in financial econometrics mathematical finance and applied statistics in addition to quants and data scientists in the field of quantitative finance Machine Learning in Finance From Theory to Practice is divided into three parts each part covering theory and applications The first presents supervised learning for cross sectional data from both a Bayesian and frequentist perspective The more advanced material places a firm emphasis on neural networks including deep learning as well as Gaussian processes with examples in investment management and derivative modeling The second part presents supervised learning for time series data arguably the most common data type used in finance with examples in trading stochastic volatility and fixed income modeling Finally the third part presents reinforcement learning and its applications in trading investment and wealth management Python code examples are provided to support the readers understanding of the methodologies and applications The book also includes more than 80 mathematical and programming exercises with worked solutions available to instructors As a bridge to research in this emergent field the final chapter presents the frontiers of machine learning in finance from a researcher s perspective highlighting how many well known concepts in statistical physics are likely to emerge as important methodologies for machine learning in finance
