Cycling Peter Cox,2019-03-15 Cycling A

Sociology of Mobility explores cycling as a sociological phenomenon Drawing on extensive ethnographic fieldwork it considers the interaction of materials, competencies and meanings that comprise a variety of cycling practices What might appear at first to be self-evident actions are shown to be constructed through the interplay of numerous social and political forces Using a theoretical framework from mobilities studies its central themes respond to the question of what it is about cycling that provokes so much interest and passion both positive and negative Individual chapters consider how cycling has appeared as theme and illustration in social theory as well as the legacies of these theorizations The book expands on the image of cycling practices as the product of an assemblage of technology, rider and environment Riding spaces as material technologies are found to be as important as the machinery of the cycle and a distinction is made between routes and rides to help interpret aspects of journey making Ideas of both affordance and script are used to explore how elements interact in performance to create sensory and experiential scapes Consideration is also given to the changing identities of cycling practices in historical and geographical perspective The book adds to existing research by extending the theorization of cycling mobilities It engages with both current and past debates on the place of cycling in mobility systems and the problems of researching, analyzing and communicating ephemeral mobile experiences *Bicycling Infrastructure: Design for Indian Cities and Emerging Economies* Debapratim Pandit, Deepa Sharma, 2022-04-26 The book focuses on specific infrastructural solutions for bicycling for Indian cities and other emerging economies It explores the current state of bicycling infrastructure in Indian cities and proposes standard and custom designs, guidelines, 2D and 3D illustrations, technical drawings as well as relevant discussions and explanations for the choice of right infrastructural solutions according to site constraints This volume will be of great interest to those in academia and industry dedicated to a vision of creating inclusive streets in Indian cities and emerging economies to making the street safe and comfortable for bicyclists ICT for Transport Nikolas Thomopoulos, Moshe Givoni, the late Piet Rietveld, 2015-05-29 Information and Communication Technologies ICT are rapidly evolving and taking centre stage in everyday life in the 21st century alongside the increasing importance and value of information This is particularly evident in the transport sector where Cycling Futures Regine Gerike, John Parkin, 2016-03-09 Pointing the way to the future of research and development in relation to cycling as a mode of transport this book investigates some of the significant recent developments in the technology provision for and take up of cycling in various parts of the world Tensions at the heart of the nature of cycling remain on the one hand cycling is frequently viewed as being a risky activity while on the other hand it is seen as being a way of allowing populations to live healthier lives Reviewing this dichotomy the authors in this book consider the ways that cycling is planned and promoted This is done partly in relation to these issues of risk and health but also from the broader perspective of behavioural response to the changing nature of cycling A section on methodologies is also included which outlines the current state of the art and points a way to future research *Planning After Petroleum* Jago Dodson, Neil Sipe, Anitra Nelson, 2016-10-04 The past decade has been one

of the most volatile periods in global petroleum markets in living memory and future oil supply security and price levels remain highly uncertain This poses many questions for the professional activities of planners and urbanists because contemporary cities are highly dependent on petroleum as a transport fuel How will oil dependent cities respond and adapt to the changing pattern of petroleum supplies What key strategies should planners and policy makers implement in petroleum vulnerable cities to address the challenges of moving beyond oil How might a shift away from petroleum provide opportunities to improve or remake cities for the economic social and environmental imperatives of twenty first century sustainability Such questions are the focus of contributors to this book with perspectives ranging across the planning challenge overarching petroleum futures governance transition and climate change questions the role of various urban transport nodes and household responses ways of measuring oil vulnerability and the effects on telecommunications ports and other urban infrastructure This comprehensive volume with contributions from and focusing on cities in Australia the UK the US France Germany the Netherlands and South Korea provides key insights to enable cities to plan for the age beyond petroleum

GIS in Sustainable Urban Planning and Management Martin van Maarseveen,Javier Martinez,Johannes Flacke,2018-12-07 The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.1201/9781315146638> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license GIS is used today to better understand and solve urban problems GIS in Sustainable Urban Planning and Management A Global Perspective explores and illustrates the capacity that geo information and GIS have to inform practitioners and other participants in the processes of the planning and management of urban regions The first part of the book addresses the concept of sustainable urban development its different frameworks the many ways of measuring sustainability and its value in the urban policy arena The second part discusses how urban planning can shape our cities examines various spatial configurations of cities the spread of activities and the demands placed on different functions to achieve strategic objective It further focuses on the recognition that urban dwellers are increasingly under threat from natural hazards and climate change Written by authors with expertise on the applications of geo information in urban management this book showcases the importance of GIS in better understanding current urban challenges and provides new insights on how to apply GIS in urban planning It illustrates through real world cases the use of GIS in analyzing and evaluating the position of disadvantaged groups and areas in cities and provides clear examples of applied GIS in urban sustainability and urban resilience The idea of sustainable development is still very much central in the new development agenda of the United Nations and in that sense it is of particular importance for students from both the Global South and Global North Professionals researchers and students alike will find this book to be an invaluable resource for understanding and solving problems relating to sustainable urban planning and management

Bicycle Utopias Cosmin Popan,2019-01-15 **Bicycle Utopias** investigates the future of urban mobilities and post car societies arguing that the bicycle can become the nexus

around which most human movement will revolve Drawing on literature on post car futures Urry 2007 Dennis and Urry 2009 transition theory Geels et al 2012 and utopian studies Levitas 2010 2013 this book imagines a slow bicycle system as a necessary means to achieving more sustainable mobility futures The imagination of a slow bicycle system is done in three ways Scenario building to anticipate how cycling mobilities will look in the year 2050 A critique of the system of automobility and of fast cycling futures An investigation of the cycling senses and sociabilities to describe the type of societies that such a slow bicycle system will enable Bicycle Utopias will appeal to students and scholars in fields such as sociology mobilities studies human geography and urban and transport studies This work may also be of interest to advocates activists and professionals in the domains of cycling and sustainable mobilities

Building the Cycling City Melissa Bruntlett, Chris Bruntlett, 2018-08-28 The world is rediscovering the bicycle as a multi pronged solution to acute 21st century problems including affordability obesity congestion climate change inequity and social isolation The Netherlands has built an accessible cycling culture that cities around the world can learn from Chris and Melissa Bruntlett share the incredible success of the Netherlands through engaging interviews with local experts and stories of their own delightful experiences riding in five Dutch cities Building the Cycling City examines the triumphs and challenges of the Dutch while also presenting stories of North American cities already implementing lessons from across the Atlantic Discover how Dutch cities inspired Atlanta to look at its transit bike connection in a new way and showed Seattle how to teach its residents to realize the freedom of biking along with other encouraging examples

The Sustainable Urban Design Handbook Nico Larco, Kaarin Knudson, 2024-04-30 The Sustainable Urban Design Handbook gathers the best sustainability practices and latest research from the fields of architecture landscape architecture planning development ecology and environmental engineering and presents them in a graphically rich and accessible format that can help guide urban design decisions in cities of all sizes The book presents a comprehensive framework that organizes more than 50 elements of sustainable urban design under five main topics Energy Use Greenhouse Gas Water Ecology Habitat Energy Use Production and Equity Health and relative to four project scales Region City District Neighborhood Block Street and Project Parcel Each element chapter includes a summary of importance and background compares typical practices and recommended approaches explains connections to other elements and concludes with urban design guidelines that can be used to directly inform projects and decisions Easy to use and reference The Sustainable Urban Design Handbook provides both an in depth introduction to topics across sustainable urban design and serves as an on going reference for anyone involved in the creation of sustainable urban environments This resource will be useful to design and planning professionals community members students and elected officials in guiding decisions about our sustainable future

Cycling to Work Patrick R  rat, 2020-12-07 This book presents a thorough discussion of utility cycling cycling in the urban environment and everyday mobility It is based on large survey answered by 14 000 participants in the bike to work action in Switzerland and quantifies the various dimensions of

utility cycling It proposes an innovative theoretical framework to analyse and understand the various dimensions of the uses of bikes and their diversity It addresses the factors that motivate commuters to get on their bike and highlights the barriers to this practice between deficient infrastructures and lack of legitimacy This research makes a diagnosis and discusses the way to develop this sustainable mode of transportation By combining quantitative results in the form of tables figures and maps and including qualitative results in the form of quotations from survey participants this book provides a thorough and enjoyable read It will be of interest to researchers policy makers advanced students in the field of urban planning social sciences and transportation

Cycling Cultures Peter Cox, 2015-05-19 Cycling studies is a rapidly growing area of investigation across the social sciences reflecting and engaged with rapid transformations of urban mobility and concerns for sustainability This volume brings together a range of studies of cycling and cyclists examining some of the diversity of practices and their representation Its international contributors cross the boundaries of academia and professional engagement linking theory and practice to shed light on the very real processes of change that are reshaping our mobility

Routledge Companion to Cycling Glen Norcliffe, Una Brogan, Peter Cox, Boyang Gao, Tony Hadland, Sheila Hanlon, Tim Jones, Nicholas Oddy, Luis Vivanco, 2022-12-14 Routledge Companion to Cycling presents a comprehensive overview of an artefact that throughout the modern era has been a bellwether indicator of the major social economic and environmental trends that have permeated society The volume synthesizes a rapidly growing body of research on the bicycle its past and present uses its technological evolution its use in diverse geographical settings its aesthetics and its deployment in art and literature From its origins in early modern carriage technology in Germany it has generated what is now a vast multi disciplinary literature encompassing a wide range of issues in countries throughout the world

Urban Mobility and Social Equity in Latin America Daniel Oviedo, Natalia Villamizar Duarte, Ana Marcela Ardila Pinto, 2020-11-16 This volume of Transport and Sustainability focuses on how spatial and social mobilities are intertwined in the reproduction of spatial and social inequities in Latin American cities
