Economics: The User's Guide Ha-Joon Chang, 2015-10-20 From the internationally bestselling author and prizewinning economist a highly original guide to the global economy In his bestselling *23 Things They Don't Tell You About Capitalism* Cambridge economist Ha Joon Chang brilliantly debunked many of the predominant myths of neoclassical economics Now in an entertaining and accessible primer he explains how the global economy actually works in real world terms Writing with irreverent wit a deep knowledge of history and a disregard for conventional economic pieties Chang offers insights that will never be found in the textbooks Unlike many economists who present only one view of their discipline Chang introduces a wide range of economic theories from classical to Keynesian revealing how each has its strengths and weaknesses and why there is no one way to explain economic behavior Instead by ignoring the received wisdom and exposing the myriad forces that shape our financial world Chang gives us the tools we need to understand our increasingly global and interconnected world often driven by economics From the future of the Euro inequality in China or the condition of the American manufacturing industry here in the United States *Economics The User's Guide* is a concise and expertly crafted guide to economic fundamentals that offers a clear and accurate picture of the global economy and how and why it affects our daily lives

Advances in Brand Semiotics & Discourse Analysis George Rossolatos, 2023-03-07 This volume addresses some of the most important conceptual methodological and empirical challenges and opportunities with which the sister disciplines of semiotics and discourse analysis are mutually confronted in the context of considering new avenues of cross disciplinary application to distinctive branding research streams In continuation of the collective volume *Handbook of Brand Semiotics* Kassel University Press 2015 which sought to consolidate relevant scholarship and to identify the main territories that have been established at the cross roads between branding and semiotic research the current *Advances in Brand Semiotics Discourse Analysis* aims at accomplishing further strides in critical areas such as the exigency for reconsidering the aptness of existing semiotic theories in the face of the radically shifting co creative landscape of digital branding the benefits of systematically micro analyzing brand communities discourses by drawing on CAQDAS programs the

combination of big data analytics with discourse theory in corpus analysis and the epistemological issues that emerge while combining discourse analysis with time hallowed marketing qualitative and quantitative research methods At the same time the volume hosts a resourceful blend of empirical studies and novel conceptual frameworks in burgeoning streams such as place heritage culinary personal and political branding *Earth Capitalism* Patrick Petit, 2017-09-29 Today a deepening global recession is causing economic hardships for all kinds of businesses Earth Capitalism attributes the crisis to inappropriate macroeconomic policies and excessive expansion of financial institutions in blind pursuit of profit lack of self discipline among financial institutions and the failure of supervision and regulation to keep up with financial innovations Collectively these are some of the main causes of the current global economic malaise Petit argues that human greed and insatiability are the true source of disparities around the world Greed is the reason why we are depleting the Earth's natural resources and destroying its ecosystems He argues that instead a good life should be based on balanced give and take When we take something from society or the Earth we have to maintain a balance by giving something equivalent back Happiness is founded on gratitude for what one has and one should engage in an overall appraisal of life not what one lacks He believes the same principle should be applied to management of the Earth's natural resources and goods The current global crisis impels us to create a responsible capitalism one that benefits all living beings on this planet It reminds us to live a simpler life based on true well being and life satisfaction but simple living is not about living in poverty As its subtitle suggests Earth Capitalism's contributors present leading edge economic concepts business models and best practices that show the path toward creation of responsible capitalism a viable scenario emerging from the current global economic and financial crisis

Branding with Brains Tjaco Walvis, 2012-10-12 What has neuroscience got to do with branding The link may not be immediately obvious but the fact is our brains select brands in much the same way that Google selects websites So just as web marketers play on Google's algorithm to make sure their site appears as high up the search list as possible brand marketers should play on the brain's algorithm to make sure their brand is at the top of their customers minds at the moment they choose which brand to buy This ground breaking new book brings the proven effects of hard science to the creative practice of branding It shows you how to harness this powerful combination to your own advantage by helping you understand how customers brains work when they choose brands A strong brand cannot be built effectively without taking into account the laws of the brain which as this book shows really exist and can be scientifically proven to work Once you know this you can apply the familiar branding laws of relevance coherence and participation more precisely more confidently and to much greater effect This means your brand will have a much greater chance of being chosen by customers than your competitors brands Branding with Brains shatters the conventional approach to branding which is based on hunches and intuition by uncovering the hard scientific truth about why customers choose some brands over others Insights into company stories from Leica to Innocent Drinks from Starbucks to Schiphol International Airport give you the fascinating truth about
