

Dialogic Teaching and Communicative approaches

The five principles for dialogic teaching (Alexander, 2006) which bring together the essential features of dialogic teaching in the classroom:

Collective: teachers and children address learning tasks together, whether as a group or as a class, rather than in isolation;

Reciprocal: teachers and children listen to each other, share idea and consider alternative viewpoints;

Supportive: children articulate their ideas freely, without fear of embarrassment over 'wrong' answers; and they help each other to reach common understandings;

Cumulative: teachers and children build on their own and each others' ideas and chain them into coherent lines of thinking and enquiry;

Purposeful: teachers plan and facilitate dialogic teaching with particular educational goals in view.

Mortimer & Scott model of communicative approaches with four categories; interactive/authoritative, interactive/dialogic, non-interactive/dialogic, non-interactive/authoritative.

Richard Andrews

Dialogic Approaches To Teaching And Learning In The:

Dialogic Pedagogy David Skidmore, Kyoko Murakami, 2016-08-18 This book provides a wide ranging and in depth theoretical perspective on dialogue in teaching It explores the philosophy of dialogism as a social theory of language and explains its importance in teaching and learning Departing from the more traditional teacher led mode of teacher student communication the dialogic approach is more egalitarian and focuses on the discourse exchange between the parties Authors explore connections between dialogic pedagogy and sociocultural learning theory and argue that dialogic interaction between teacher and learners is vital if instruction is to lead to cognitive development The book also presents prosody as a critical resource for understanding between teachers and students and includes some of the first empirical studies of speech prosody in classroom discourse

The Routledge International Handbook of Research on Dialogic Education Neil Mercer, Rupert Wegerif, Louis Major, 2019-09-26 The Routledge International Handbook of Research on Dialogic Education provides a comprehensive overview of the main ideas and themes that make up the exciting and diverse field of Dialogic Education With contributions from the world s leading researchers it describes underpinning theoretical approaches debates methodologies evidence of impact how Dialogic Education relates to different areas of the curriculum and ways in which work in this field responds to the profound educational challenges of our time The handbook is divided into seven sections covering The theory of Dialogic Education Classroom dialogue Dialogue teachers and professional development Dialogic Education for literacy and language Dialogic Education and digital technology Dialogic Education in science and mathematics Dialogic Education for transformative purposes Expertly written and researched the handbook marks the coming of age of Dialogic Education as an important and distinctive area of applied educational research Featuring chapters from authors working in different educational contexts around the world the handbook is of international relevance and provides an invaluable resource for researchers and students concerned with the study of educational dialogue and allied areas of socio cultural research It will interest students on PhD programmes in Education Faculties Master s level courses in Education and postgraduate teacher training courses The accounts of results achieved by high impact research projects around the world will also be very valuable for policy makers and practitioners

Dialogical Approaches and Tensions in Learning and Development Nathalie Muller Mirza, Marcelo Dos Santos Mamed, 2021-10-26 The book pursues the goal of exploring and strengthening a dialogical approach of communication and cognition It brings together contributions from world leading researchers related to the dialogical approach in education and psychology It presents among others the place of language and materiality in the development of communication and thinking as well as the role of the methods in the relationship between researchers and participants This leads to an innovative definition of the dialogicality and how a dialogical approach can provide heuristic conceptual and methodological tools to better understand how people think communicate and learn in a complex world The authors hereby develop an epistemological framework inspired by scholars

such as Michael Bakhtin, Lev Vygotsky and Herbert Mead under the assumption that dialogue or dialogicality and therefore the presence of the other is fundamentally entangled into the human thinking and development. This book contributes to the understanding of human communication, cognition and mind and participates in a scientific dialogue which helps to advance future research. It includes theoretical and empirical chapters and presents innovative methods of inquiry which makes it a useful tool for both teaching and research.

Developing Interactive Teaching And Learning Using The Iwb Hennessy, Sara, Warwick, Paul, 2013-10-01. This resource aims to provide teachers with the rationale, model and examples they need to develop interactive approaches that will promote learning when using Interactive Whiteboards (IWBs) in the classroom.

Synchronous and Asynchronous Approaches to Teaching Payal Kumar, Jacob Eisenberg, 2023-07-25. This book examines synchronous and asynchronous teaching in light of the COVID-19 pandemic. Within a few weeks, millions of teachers found themselves forced to teach online, often with little systematic preparation and in their own homes. While this mode of teaching was earlier seen to be supplementary to brick and mortar classes, online teaching has become pivotal to the classroom experience. The chapter authors write of shared experiences that encapsulate the challenges faced by faculty, students and also higher education institutions. The book covers what worked, what did not work and what had to be changed during the rapid shift to online synchronous and asynchronous teaching during the lockdowns. Comprising both theoretical and practical perspectives, this book provides one of the first authoritative analyses of the field while gathering lessons to be learned from the pandemic.

Dialogic Education and Technology Rupert Wegerif, 2007-10-13. Dialogic Education and Technology is about using new technology to draw people into the kind of dialogues which take them beyond themselves into learning, thinking and creativity. The program of research reported in this book reveals key characteristics of learning dialogues and demonstrates ways in which computers and networks can deepen, enrich and expand such dialogues. A dialogic perspective is developed drawing upon recent work in communications theory, psychology, computer science and philosophy. This perspective foregrounds the creative space opened up by authentic dialogues. Whereas studies of computer supported collaborative learning have tended to see dialogue as a means to the end of knowledge construction, the dialogic perspective taken by this book sees dialogue as an end in itself. In fact, moving learners into the space of dialogue is described as the core aim of education. The central argument of the book is that there is a convergence between this dialogic perspective in education and the affordances of new information and communications technology. A genuinely dialogic perspective is relatively new to the field of educational technology and there is a considerable amount of interest in this topic amongst researchers who wish to see what extra insights if any a dialogical approach can offer them. This is an exciting book that synthesizes, clarifies and extends mounting discussions of dialogical thinking related to computer supported education. It is not only a delightful personal statement but provokes thought on central issues of CSCL and enters into challenging dialog with the relevant alternative approaches. As a result of reading this book, I am convinced that we urgently need to open new

online spaces for people to understandingly interact with different perspectives and creatively generate new insight and respect for difference Gerry Stahl Executive Editor of the International Journal of Computer Supported Collaborative Learning This book offers a set of lenses which give deep insight into education and the use of technologies for learning The moves between empirical studies theoretical reflections and discussion of the design of learning environments make the book very thought provoking Ideas are not just treated as ideas but they become transformed into principles for design Wegerif is convincing that the use of technology for the creation maintaining and development of dialogical spaces has the potential for transforming and expanding educational experiences in a way which offers a needed vision of learning for the future Sten Ludvigsen Director of the InterMedia Centre for design communication and learning University of Oslo

Dialogic Education and Technology Rupert Wegerif, 2007-11-07 Discusses about using technology to draw people into the kind of dialogues which take them beyond themselves into learning thinking and creativity This book reveals key characteristics of learning dialogues and demonstrates ways in which computers and networks can deepen enrich and expand such dialogues

Professional Development for Inquiry-Based Science Teaching and Learning Olia E. Tsivitanidou, Peter Gray, Eliza Rybska, Loucas Louca, Costas P. Constantinou, 2018-09-03 This book examines the implementation of inquiry based approaches in science teaching and learning It explores the ways that those approaches could be promoted across various contexts in Europe through initial teacher preparation induction programmes and professional development activities It illustrates connections between scientific knowledge deriving from the science education research community teaching practices deriving from the science teachers community and educational innovation Inquiry Based Science Teaching and Learning IBST L has been promoted as a policy response to pressing educational challenges including disengagement from science learning and the need for citizens to be in a position to evaluate evidence on pressing socio scientific issues Effective IBST L requires well prepared and skilful teachers who can act as facilitators of student learning and who are able to adapt inquiry based activity sequences to their everyday teaching practice Teachers also need to engage creatively with the process of nurturing student abilities and to acquire new assessment competences The task of preparing teachers for IBST L is a challenging one This book is a resource for the implementation of inquiry oriented approaches in science education and illustrates ways of promoting IBST L through initial teacher preparation induction and professional development programmes

The Praeger Handbook of Education and Psychology Raymond Horn, Joe Kincheloe, 2006-12-30 Cognition mind counseling psychology lesson plans learning styles and Vygotsky are just a few of the many subjects discussed in this exciting work Educators students counselors parents and others will find new understanding as they read and browse How does the immigrant experience affect student outcomes What are the effects of poverty on standardized testing How can a teacher or parent develop study skills in the special needs learner What is the effect of the school environment on students What are the larger issues at work in educating students of diverse races cultures and classes This work a rethinking of school psychology

will be an essential resource for anyone who is interested in teaching and learning. It combines effective traditional knowledge with contemporary insights into the nature of today's schools and students. **Dialogic Approaches to TESOL** Shelley Wong, 2022-02-16. This book locates dialogic pedagogy within the history of TESOL approaches and methods in which the communicative approach has been the dominant paradigm. Dialogic inquiry in the form of story telling, oral histories and knowledge from the ground up and from the margins has much to offer the field. In dialogic approaches, the teacher and students learn in community and the students' home languages and cultures, their families and communities are seen as resources. *Dialogic Approaches to TESOL: Where the Ginkgo Tree Grows* explores teacher research, feminist contributions to voice, social identity and dialogic pedagogy and the role of teachers, students, families and communities as advocates and change agents. After a brief history of TESOL methods and an introduction to dialogic pedagogy, four features of dialogic approaches to TESOL are identified and discussed: learning in community, problem posing, learning by doing and who does knowledge serve. The main text in each chapter considers a single topic related to the concept of dialogic pedagogy. Branching text leads to related discussions without losing the main point of the chapter. This structure allows readers to become well rooted in each component of dialogic pedagogy and to branch out into deeper philosophical understandings as well as actual practices across a range of contexts. *Dialogic Approaches to TESOL* offers a place for dialogue and reflection on the prospects for transforming educational institutions to serve those who have historically been excluded and marginalized. It provides questions, frameworks and resources for those who are just beginning in the field and for U.S.-based educators who want to bring critical, multicultural and multilingual perspectives into language arts, reading and literacy education.

Re-theorising Learning and Research Methods in Learning Research Crina Damsa, Antti Rajala, Giuseppe Ritella, Jasperina Brouwer, 2023-09-22. *Re-Theorising Learning and Research Methods in Learning Research* explores the latest developments in the field of learning theory, offering an overview of emerging methods and demonstrating how recent research contributes to furthering understanding of learning. This book illustrates how theory and methods inform one another, facilitating advancements in the field while addressing the ways in which societal and technological change create a need for adapting approaches to examining learning. Drawing on an international team of contributors, this book comprises 17 chapters and three commentaries thematically organised into three broad sections: emerging theories and conceptualisations of learning and how they drive methodological development; new methods or innovative use of existing methods and their contribution to theory development; theories and methods that emerge in connection with societal changes. Both novice researchers and more experienced scholars will benefit from an overview of recent theoretical and methodological advances in the learning research field. This is an invaluable resource for researchers in the learning and educational research field and will also support Masters and PhD students to understand how learning theories and research methodology in the field have been evolving in recent years. *Mind Expanding: Teaching For Thinking And Creativity In Primary Education* Wegerif,

Rupert,2010-08-01 There is considerable interest in education around the world in flexible thinking and learning skills but very little consensus as to the nature of these skills and how best to promote them in schools This book puts forward a clear and practical framework for understanding thinking creativity and learning to learn as the fruits of engagement in dialogue It also outlines in detail how this framework can be applied to teaching across the curriculum at both primary and secondary level drawing on the best practices associated with the teaching thinking creativity and learning to learn movements explaining their success in terms of dialogic theory In particular the book incorporates aspects of a number of thinking skills approaches such as Lipman s Philosophy for Children approach as well as features of contemporary innovations in education such as assessment for learning and the development of creativity Each chapter opens with a vignette to set the scene and continue into a light and popularly written exposition of theory before moving on to a description of practice and concluding with practical guidelines for how to teach for thinking and creativity in schools and classrooms The first six chapters in the book have more of a focus on developing core theoretical themes and the following six chapters in the second half of the book focus more on practice led themes The relationship between theory and practice is treated as flexible and dynamic theory being developed by practice as much as practice implementing theory *The Routledge International Handbook of Research on Dialogic Education* Neil Mercer,Rupert Wegerif,Louis Major,2019-09-26 The Routledge International Handbook of Research on Dialogic Education provides a comprehensive overview of the main ideas and themes that make up the exciting and diverse field of Dialogic Education With contributions from the world s leading researchers it describes underpinning theoretical approaches debates methodologies evidence of impact how Dialogic Education relates to different areas of the curriculum and ways in which work in this field responds to the profound educational challenges of our time The handbook is divided into seven sections covering The theory of Dialogic Education Classroom dialogue Dialogue teachers and professional development Dialogic Education for literacy and language Dialogic Education and digital technology Dialogic Education in science and mathematics Dialogic Education for transformative purposes Expertly written and researched the handbook marks the coming of age of Dialogic Education as an important and distinctive area of applied educational research Featuring chapters from authors working in different educational contexts around the world the handbook is of international relevance and provides an invaluable resource for researchers and students concerned with the study of educational dialogue and allied areas of socio cultural research It will interest students on PhD programmes in Education Faculties Master s level courses in Education and postgraduate teacher training courses The accounts of results achieved by high impact research projects around the world will also be very valuable for policy makers and practitioners *The Handbook of Community Practice* Marie Weil,Michael Reisch,2005 Encompassing community development organizing planning and social change as well as globalisation this book is grounded in participatory and empowerment practice The 36 chapters assess practice theory and research methods **Pre-Service and In-Service Teacher Education: Concepts, Methodologies, Tools,**
