catches are declining and the stocks of key species such as cod and bluefin tuna are but a small fraction of their previous abundance while others have been overfished almost to extinction The oceans are depleted and the commercial fishing industry increasingly depends on subsidies to remain afloat In these essays award winning biologist Dr Daniel Pauly offers a thought provoking look at the state of today s global fisheries and a radical way to turn it around Starting with the rapid expansion that followed World War II he traces the arc of the fishing industry s ensuing demise offering insights into how and why it has failed With clear convincing prose Dr Pauly draws on decades of research to provide an up to date assessment of ocean health and an analysis of the issues that have contributed to the current crisis including globalization massive underreporting of catch and the phenomenon of shifting baselines in which over time important knowledge is lost about the state of the natural world Finally *Vanishing Fish* provides practical recommendations for a way forward a vision of a vibrant future where small scale fisheries can supply the majority of the world s fish Published in Partnership with the David Suzuki Institute
