Aragonés, J.L. González, Antonio Rubio, 2013-03-09 Modern microelectronic design is characterized by the integration of full systems on a single die These systems often include large high performance digital circuitry high resolution analog parts high driving I O and maybe RF sections Designers of such systems are constantly faced with the challenge to achieve compatibility in electrical characteristics of every section some circuitry presents fast transients and large consumption spikes whereas others require quiet environments to achieve resolutions well beyond millivolts Coupling between those sections is usually unavoidable since the entire system shares the same silicon substrate bulk and the same package Understanding the way coupling is produced and knowing methods to isolate coupled circuitry and how to apply every method is then mandatory knowledge for every IC designer Analysis and Solutions for Switching Noise Coupling in Mixed Signal ICs is an in depth look at coupling through the common silicon substrate and noise at the power supply lines It explains the elementary knowledge needed to understand these phenomena and presents a review of previous works and new research results The aim is to provide an understanding of the reasons for these particular ways of coupling review and suggest solutions to noise coupling and provide criteria to apply noise reduction Analysis and Solutions for Switching Noise Coupling in Mixed Signal ICs is an ideal book both as introductory material to noise coupling problems in mixed signal ICs and for more advanced designers facing this problem *Proceedings of the 2025 2nd International Conference on Electrical Engineering and Intelligent Control (EEIC 2025)* Ata Jahangir Moshayedi, 2025-11-20 This is an open access book The organizing committee is honored to extend a heartfelt welcome to the 2nd International Conference on Electrical Engineering and Intelligent Control EEIC 2025 Building on the resounding success of its inaugural edition in Singapore 2024 as part of the Conference on Intelligent Collaboration CIC series this year s conference will convene in Auckland New Zealand reaffirming its role as a global nexus uniting leading researchers scholars and industry pioneers in electrical engineering and intelligent control Auckland s dynamic fusion of world class academia a thriving innovation ecosystem and a steadfast commitment to sustainability mirrors
