Biometric Authentication Davide Maltoni, Anil K. Jain, 2004-09-21 Biometric authentication is increasingly gaining popularity in a large spectrum of applications ranging from government programs e.g. national ID cards visas for international travel and the fight against terrorism to personal applications such as logical and physical access control Although a number of effective solutions are currently available new approaches and techniques are necessary to overcome some of the limitations of current systems and to open up new frontiers in biometric research and development The 30 papers presented at Biometric Authentication Workshop 2004 BioAW 2004 provided a snapshot of current research in biometrics and identify some new trends This volume is composed of five sections face recognition fingerprint recognition template protection and security other biometrics and fusion and multimodal biometrics For classical biometrics like fingerprint and face recognition most of the papers in Sect 1 and 2 address robustness issues in order to make the biometric systems work in suboptimal conditions examples include face detection and recognition under uncontrolled lighting and pose variations and fingerprint matching in the case of severe skin distortion Benchmarking and interoperability of sensors and liveness detection are also topics of primary interest for fingerprint based systems Biometrics alone is not the solution for complex security problems Some of the papers in Sect 3 focus on designing secure systems this requires dealing with safe template

storage checking data integrity and implementing solutions in a privacy preserving fashion The match on tokens approach provided that current accuracy and cost limitations can be satisfactorily solved by using new algorithms and hardware is certainly a promising alternative The use of new biometric indicators like eye movement 3D finger shape and soft traits e.g.

Introduction to Biometrics Anil K. Jain, Arun A. Ross, Karthik Nandakumar, 2011-11-18 Biometric recognition or simply biometrics is the science of establishing the identity of a person based on physical or behavioral attributes It is a rapidly evolving field with applications ranging from securely accessing one's computer to gaining entry into a country While the deployment of large scale biometric systems in both commercial and government applications has increased the public awareness of this technology *Introduction to Biometrics* is the first textbook to introduce the fundamentals of Biometrics to undergraduate graduate students The three commonly used modalities in the biometrics field namely fingerprint face and iris are covered in detail in this book Few other modalities like hand geometry ear and gait are also discussed briefly along with advanced topics such as multibiometric systems and security of biometric systems Exercises for each chapter will be available on the book website to help students gain a better understanding of the topics and obtain practical experience in designing computer programs for biometric applications These can be found at <http://www.csee.wvu.edu/ross>

Biometrics Text Book Designed for undergraduate and graduate students in computer science and electrical engineering *Introduction to Biometrics* is also suitable for researchers and biometric and computer security professionals *Biometric Systems* James L. Wayman, Anil K. Jain, Davide Maltoni, Dario Maio, 2005-09-20 *Biometric Systems* provides practitioners with an overview of the principles and methods needed to build reliable biometric systems It covers three main topics key biometric technologies design and management issues and the performance evaluation of biometric systems for personal verification identification The four most widely used technologies are focused on speech fingerprint iris and face recognition Key features include in depth coverage of the technical and practical obstacles which are often neglected by application developers and system integrators and which result in shortfalls between expected and actual performance and protocols and benchmarks which will allow developers to compare performance and track system improvements *3D ...
