Design and Safety Assessment of Critical Systems Marco Bozzano,Adolfo Villafiorita,2010-11-12 Safety critical systems by definition those systems whose failure can cause catastrophic results for people the environment and the economy are becoming increasingly complex both in their functionality and their interactions with the environment Unfortunately safety assessments are still largely done manually a time consuming and error prone

Model Based Specification for Developing Safety-critical System-software Anand K. Karasi,2000 *Planning the Unplanned Experiment* National Aeronautics and Space Adm Nasa,2019-01-14 We need well founded means of determining whether software is t for use in safety critical applications While software in industries such as aviation has an excellent safety record the fact that software aws have contributed to deaths illustrates the need for justi ably high con dence in software It is often argued that software is t for

safety critical use because it conforms to a standard for software in safety critical systems But little is known about whether such standards work Reliance upon a standard without knowing whether it works is an experiment without collecting data to assess the standard this experiment is unplanned This paper reports on a workshop intended to explore how standards could practicably be assessed Planning the Unplanned Experiment Assessing the Eacy of Standards for Safety Critical Software AESSCS was held on 13 May 2014 in conjunction with the European Dependable Computing Conference EDCC We summarize and elaborate on the workshop s discussion of the topic including both the presented positions and the dialogue that ensued NASA TM 2015 218804 L 20575 NF1676L 21790 Graydon Patrick J and Holloway C Michael Langley Research Center

A System-Theoretic Safety Engineering Approach for Software-Intensive Systems Asim Ali Ahmed Abdulkhaleq, 2017-02-23 Software safety is a crucial aspect during the development of modern safety critical systems However safety is a system level property and therefore must be considered at the system level to ensure the whole system s safety In the software development process formal verification and functional testing are complementary approaches which are used to verify the functional correctness of software however even perfectly reliable software could lead to an accident The correctness of software cannot ensure the safe operation of safety critical software systems Therefore developing safety critical software requires a more systematic software and safety engineering process that enables the software and safety engineers to recognize the potential software risks For this purpose this dissertation introduces a comprehensive safety engineering approach based on STPA for Software Intensive Systems called STPA SwISs which provides seamless STPA safety analysis and software safety verification activities to allow the software and safety engineers to work together during the software development for safety critical systems and help them to recognize the associated software risks at the system level

Development and Verification of Software for Flight Safety Critical Systems H. Afzali, A. Mattissek, LITEF DER HELIGE GMBH FREIBURG IM BREISGAU (GERMANY F R), 1991 In Flight Safety Critical Systems where the lives of people and or mission success is depending on errors in the Computer Software Components can have a catastrophic impact on the safety The requirements for the software development and maintenance of Flight Safety Critical systems differ in some aspects from the systems which do not fall into this category The reason for these requirement is to produce the right product at the very beginning of the system s usage and to ensure special attention is paid throughout the whole service life of the equipment The reliability and safety requirements can reach a point where testing alone is not sufficient Consequently adequate control mechanisms have to be applied The software configuration management quality control verification and validation must be rigorously adhered to For the development of the equipment software a set of development standards and additional procedures for the implementation of Safety Critical Functions are defined LITEF applied the standards and procedures for the development of the Inertial Measurement Unit which is a part of the Flight Control System and Seat Sequencer Unit which is part of the Ejection Seat In this paper some critical technology needs are described for supporting

the development and verification process of such systems and the activities which have to be performed during the development phases for identifying assessing and eliminating or minimizing hazards in a systematic way

Developments in Risk-based Approaches to Safety Felix Redmill, Tom Anderson, 2007-12-28 Developments in Risk based Approaches to Safety contains the invited papers presented at the Fourteenth annual Safety critical Systems Symposium held at Bristol UK in February 2006 The papers included in this volume address the most critical topics in the field of safety critical systems The focus this year considered from various perspectives is on recent developments in risk based approaches Subjects discussed include innovation in risk analysis management risk the safety case software safety language development and the creation of systems for complex control functions Papers provide a mix of industrial experience and academic research results and are presented under the headings Tutorial New Approaches to Risk Assessment Experience of Developing Safety Cases Management Influence on Safety Software Safety New Technologies in Safety critical Systems Adding Dimensions to Safety Cases

Achievement and Assurance of Safety Felix Redmill, Tom Anderson, 2012-12-06 Each year there are improvements in safety critical system technology These arise both from developments in the contributing technologies such as safety engineering software engineering human factors and risk assessment and from the adoption or adaptation of appropriate techniques from other domains such as security For these improvements to be of real benefit they need to be applied during the appropriate stage in the life cycle of the system whether it be development assessment or operation For this to occur they must be communicated and explained Each year the Safety critical Systems Symposium offers a distinguished forum for the presentation of papers on such developments and also for papers from industry on the lessons learned from the use of technologies and methods The results of many collaborative research projects with components from both industry and academia are reported in a universally understandable form In 1995 the Symposium was held in Brighton a venue calculated to stimulate not just the presenters of papers but all the delegates Yet this book of Proceedings is intended not only for the delegates but also for readers not able to attend the event itself We welcome both categories of reader Delegates have the benefit of attending the presentations and the opportunity to participate in the discussions those who take up this book after the event can peruse it at their leisure and perhaps on account of it will resolve to attend subsequent symposia

A Quality Assurance Model for Airborne Safety-critical Software Habib A. El Sabbagh, 2006 Software applications in which failure may result in possible catastrophic consequences on human life are classified as safety critical These applications are widely used in a variety of fields and systems such as airborne systems nuclear reactors control and medical diagnostic equipment Unfortunately the world has seen several accidents and tragedies caused by software failure error or where such failure error was part of the problem This thesis looks into safety critical software embedded in airborne systems It proposes a lifecycle specially modeled for the development of safety critical software in aerospace and in compliance with the DO 178B standard and a software quality assurance SQA model based on a

set of four acceptance criteria that builds quality into safety critical software throughout its development The thesis also provides frameworks and guidelines for the implementation of the proposed SQA model in addition to sets of rules defining how to assess the software development with respect to the four acceptance criteria

Safety-critical Systems F. Redmill, T. Anderson, Tom Anderson, 1993-02-28 Felix Redmill and Tom Anderson have edited one of the first books to appear on this vital subject This important volume covers the development of computer systems for use in safety critical applications the technologies used and the experience of those using them There are contributions from many leading experts in the field

Technology and Assessment of Safety-Critical Systems Felix Redmill, Tom Anderson, 2012-12-06 The programme for the Second Safety critical Systems Symposium was planned to examine the various aspects of technology currently employed in the design of safety critical systems as well as to emphasise the importance of safety and risk management in their design and operation assessment There is an even balance of contributions from academia and industry Thus industry is given the opportunity to express its views of the safety critical domain and at the same time offered a glimpse of the technologies which are currently under development and which if successful will be available in the medium term future In the field of technology a subject whose importance is increasingly being recognised is human factors and there are papers on this from the University of Hertfordshire and Rolls Royce Increasingly PLCs are being employed in safety critical applications and this domain is represented by contributions from Nuclear Electric and August Computers Then there are papers on maintainability Ada reverse engineering social issues formal methods and medical systems all in the context of safety And of course it is not possible to keep the new technologies out of the safety critical domain there are papers on neural networks from the University of Exeter and knowledge based systems from ERA Technology
