Popkes, Robert Reed, Alastair Reynolds, Rick Wilber, 2011-11-10 Short novels may well be the perfect length for science fiction. They are movie length tales that resonate with moxie while exploring characters, new worlds and ideas. The stories in this unabridged collection are the best of the best short science fiction novels published in 2010 by current and emerging masters of this form. *Return to Titan* by Stephen Baxter is set in his Xeelee sequence. Michael Poole and his father search one of Saturn's moons for sentient life that would interfere with their plans to build a gateway to the stars. In this year's Theodore Sturgeon Memorial Award winner for best short fiction *The Sultan of the Clouds* by Geoffrey A. Landis, a terraforming expert is inexplicably invited to Venus by the child who owns most of the planet's habitable floating cities. *Seven Cities of Gold* by David Moles tells the story of a Japanese relief worker charged with tracking down the renegade Christian leader responsible for detonating a nuclear device in an Islam occupied North American city. In *Jackie's Boy* by Steven Popkes, an orphaned child befriends an uplifted elephant from the abandoned St. Louis Zoo as they trek south across a sparsely populated North America to find sanctuary. *A History of Terraforming* by Robert Reed involves a young boy's ambition to take up his father's work of terraforming Mars and then much of the solar system and discovers that much more than planets have been altered. In *Troika* by Alastair Reynolds, the lone survivor of a mission that explored a massive alien object attempts to reveal what he discovered despite the wishes of the Second Soviet Union. Set in the author's S-donni universe, *Several Items of Interest* by Rick Wilber, the Earth ruling aliens ask a human collaborator to help quell a human insurrection led by the collaborator's brother.

The Best Science Fiction and Fantasy of the Year Jonathan Strahan, 2011-03-01 Strahan's fifth anthology contains 29 wide ranging tales. Neil Gaiman's *The Truth Is a Cave in the Black Mountains* is a deceptively simple folktale styled story of the price one may pay for gold. *The Sultan of the Clouds* by Geoffrey Landis untangles a complex knot of childish power. Sarah Rees Brennan's *The Spy Who Never Grew Up* gives a beloved childhood icon a sinister update. Diana Peterfreund's *The Care and Feeding of Your Baby Killer Unicorn* turns unicorn lore on its head and Rachel Swirsky's *The Lady Who Plucked Red Flowers Beneath the Queen's Window* puts a fantasy spin on the temporal culture shock of immortality. This year the fantasy tales outdo the SF in depth of storytelling and characterization though all the inclusions are strong with few ideas left by the wayside.

Workshop Calculus with Graphing Calculators Nancy Baxter Hastings, 2012-12-06 This project is based on the use of graphing calculators by students enrolled in calculus. There is enough material in the book to cover precalculus review as well as first year single variable calculus topics. Intended for use in workshop centered calculus courses. Developed as part of the well known NSF sponsored project Workshop Mathematics, the text is intended for use with students in a math laboratory instead of a traditional lecture course. There are student oriented activities, experiments and graphing calculator exercises found throughout the text. The authors are well known teachers and innovative thinkers about ways to improve undergraduate mathematics teaching.
