The authors examine the relationship between complete texts both spoken and written and the social and cultural contexts in which they function. They argue that the functions of language are often best understood in a discursial environment and that exploring language in context compels us to revise commonly held understandings about the forms and meanings of language. In so doing the authors argue the need for language teachers syllabus planners and curriculum organisers to give greater attention to language as discourse. **Discourse analysis applied to english language teaching in colombian contexts: theory and methods** Wilder Yesid, Escobar Alméciga, 2016-02-29 By moving away from instrumental views of language the book Discourse Analysis Applied English Language Teaching in Colombian Contexts Theory and Methods situates the teaching and learning of English as a foreign language along a broader spectrum of socio culturally elaborated discursive dynamics. To offer this complex and multifaceted perspective it presents five discourse studies informed by diverse methodologies and aims to provoke further and deeper considerations around the issue of English teaching and learning in Colombian contexts. Similarly this work also exemplifies academic community building where different institutions researchers and students have partnered to inquire into understand and share their findings regarding EFL teaching and learning in Colombia.
