Jung And Tarot An Archetypal Journey:

Jung and Tarot Sallie Nichols,1980-06-01 Highly innovative work presenting a piercing interpretation of the tarot in terms of Jungian psychology Through analogy with the humanities mythology and the graphic arts the significance of the cards is related to personal growth and individuation The major arcana becomes a map of life and the hero s journey becomes something that each individual can relate to the symbolism of the cards and therefore to the personal life **Tarot and the Archetypal Journey** Sallie Nichols,2019 This highly innovative work presents a piercing interpretation of the tarot in terms of Jungian psychology Through analogies to the humanities mythology and the graphic arts the significance of the cards is related to personal growth and what Jung termed individuation The Major Arcana becomes a map of life and the hero s journey becomes something that each individual can relate to one s personal life Sallie Nichols in her profound investigation of the Tarot has performed an immense service Her book enriches and helps us to understand the awesome responsibilities laid upon consciousness She has done this not in an arid fashion but derived from her own experience of the Tarot and its strangely translucent lights As a result her book not only lives but quickens life in whomever it touches Laurens van der PostReplaces ISBN 978 0 87728 515 1 **Jung and Educational Theory** Inna Semetsky,2012-04-12 Jung and Educational Theory offers a new take on Jung s work providing original rich and informative material on his impact on educational research Explores Jung s writing from the standpoint of educational philosophy assessing what it has to offer to theories of education Highlights Jung s emphasis on education s role in bringing up integrated and ethical human beings Offers the perspectives of a diversity of academics and practitioners on topics ranging from the role of the unconscious in learning to the polytheistic classroom Both a valuable addition to the academic library and a significant new resource in the professional development of teachers *A Guided Tour of the Collected Works of C. G. Jung* Robert H. Hopcke,2013-02-05 The writings of C G Jung himself are the best place to read about all his main ideas but where to start when Jung s Collected Works run to more than eighteen volumes Robert H Hopcke s guide to Jung s voluminous writings shows exactly the best place to begin for getting a handle on each of Jung s key concepts and ideas from archetypal symbols to analytical psychology to UFOs Each chapter explains one of Jung s principal concerns then directs the reader where to read about it in depth in the Collected Works Each chapter includes a list of secondary sources to approach for further study which the author has updated for this edition to include books published in the ten years since the Guided Tour s first appearance *Narratives of Individuation* Raya A. Jones,Leslie Gardner,2019-04-15 In *Narratives of Individuation* Raya A Jones and Leslie Gardner present 12 cutting edge essays that bridge Jungian and narrative approaches to self understanding and offer critical appraisal of both approaches Exploring the Jungian concept of individuation and the related interest in dreams as well as the premise of the narrative self and the related interest in life stories this innovative volume interprets the topic in unique and unprecedented ways An outstanding selection of contributors cover several overarching themes to provide a comprehensive

understanding of these two powerful narratives The contributors explore historical and conceptual issues concerning the narrative self as well as applying it including to Jung s autobiography Chapters also examine how Jung developed his theory of individuation and engage with contemporary thinking in anthropology psychology including the dialogical self and Jungian psychotherapy towards refiguring how people arrive at self understanding Written by leaders in the field Narratives of Individuation is a valuable interdisciplinary resource that illuminates a multitude of perspectives on individuation and self realisation Owing to its original ideas and breadth of scope Narratives of Individuation will appeal to academics and students of Jungian and post Jungian studies anthropology psychology literary studies and anyone examining concepts of selfhood and the significance of narrativity It will also be of great interest to Jungian analysts and psychotherapists and analytical psychologists

Visual Communication David Machin,2014-04-30 The primary goal of the volume on Visual Communication is to provide a collection of high quality accessible papers that offer an overview of the different academic approaches to Visual Communication the different theoretical perspectives on which they are based the methods of analysis used and the different media and genre that have come under analysis There is no such existing volume that draws together this range of closely related material generally found in much less related areas of research including semiotics art history design and new media theory The volume has a total of 34 individual chapters that are organized into two sections theories and methods and areas of visual analysis The chapters are all written by quality theorists and researchers with a view that the research should be accessible to non specialists in their own field while at the same time maintaining a high quality of work The volume contains an introduction which plots and locates the different approaches contained in it within broader developments and history of approaches to visual communication across different disciplines as each has attempted to define its terrain sometimes through unique concepts and methods sometimes through those borrowed and modified from others

Re-Symbolization of the Self: Human Development and Tarot Hermeneutic I. Semetsky,2011-07-23 Bringing together popular and academic cultures Inna Semetsky presents Tarot as a system of transformative hermeneutics for adult self education and cultural pedagogy Her research is a decisive and intelligent step ahead from the reductive stereotype of Tarot as fortune telling The fifteen life stories at the heart of the book exemplify the author s commitment to alternative modes of education and counseling that transcend individual cultural or language barriers Assembling a rich array of sources from Hermeticism to Jungian depth psychology the philosophies of Noddings Buber and Deleuze and the science of self organization this book opens a new path to personal and social revitalization It should be widely read across disciplinary divides by scholars students and professionals alike
