Kenya Groundwater Mapping Programme Unesco:

The Role of Sound Groundwater Resources Management and Governance to Achieve Water Security

International Centre for Water Security and Sustainable Management, UNESCO, 2021-10-31 **Advances in Groundwater Governance** Karen G. Villholth, Elena Lopez-Gunn, Kirstin Conti, Alberto Garrido, Jac Van Der Gun, 2017-12-14 This book addresses groundwater governance a subject internationally recognized as crucial and topical for enhancing and safeguarding the benefits of groundwater and groundwater dependent ecosystems to humanity while ensuring water and food security under global change The multiple and complex dimensions of groundwater governance are captured in 28 chapters written by a team of leading experts from different parts of the world and with a variety of relevant professional backgrounds The book aims to describe the state of the art and latest developments regarding each of the themes addressed paying attention to the wide variation of conditions observed around the globe The book consists of four parts The first part sets the stage by defining groundwater governance exploring its emergence and evolution framing it through a socio ecological lens and describing groundwater policy and planning approaches The second part discusses selected key aspects of groundwater governance The third part zooms in on the increasingly important linkages between groundwater and other resources or sectors and between local groundwater systems and phenomena or actions at the international or even global level The fourth part finally presents a number of interesting case studies that illustrate contemporary practice in groundwater governance In one volume this highly accessible text not only familiarizes water professionals decision makers and local stakeholders with groundwater governance but also provides them with ideas and inspiration for improving groundwater governance in their own environment **State, Foreign Operations, and Related Programs Appropriations for 2015** United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2014 **Global Diagnostic on Groundwater Governance** Food and Agriculture Organization of the United Nations, 2018-07-03 This report aims at integrating regional and country experiences and projects with regard to viable groundwater management practices for the future It compiles and translates best available present scientific and technical knowledge on groundwater resources and their governance which is often highly specialized into simpler language and synoptic representations accessible to a large public of policy and decision makers across development sectors It serves as a technical basis for the visioning process and for the definition of the Framework for Action on groundwater governance This is one of 3 outputs of project GCP GLO 277 GEF expected to be published under the names of its 5 partner organizations and widely circulated to policy and decision makers in countries as well as other stakeholders of groundwater governance and practitioners around the world This outputs provides the technical basis for the other two A Global Vision for Groundwater Governance 2030 and Global Framework for Action to Achieve the Vision on Groundwater Governance *Defining Effective Transboundary Water Cooperation* Melissa McCracken, 2022-03-30 This book establishes a

framework for defining transboundary water cooperation and a methodology for evaluating its effectiveness which will contribute to more effective and therefore successful cooperation processes With the increasing focus on transboundary cooperation as a part of the Sustainable Development Goal Framework there is global recognition of transboundary water cooperation as a tool for improved governance and management of transboundary surface and groundwaters However there is not an agreed upon definition of transboundary water cooperation in the literature or in practice This book develops the Four Frames of Transboundary Water Cooperation which is a neutral modular framework for developing context specific explanatory definitions of transboundary water cooperation in basins and aquifers The Four Frames of Cooperation are legal institutional relational and outcome However we need to move beyond defining cooperation to understand better measures of the quality and effectiveness of cooperative processes The Weighted Model of Effective Cooperation presents a first step in qualitatively evaluating the effectiveness of transboundary water cooperation This model defines effective transboundary water cooperation and operationalizes a method to evaluate the effectiveness of cooperative processes over internationally shared waters Effective cooperation emphasizes the relational and outcome frames of cooperation while working towards equitability and sustainability Together the Four Frames of Cooperation and the Weighted Model of Effective Cooperation will improve the understanding of cooperation and encourage a detailed evaluation of the quality success and effectiveness of cooperative processes This book will be of great interest to students and scholars of water resource management water governance and environmental politics It will also appeal to policymakers and professionals working in the fields of water conflict water diplomacy and international cooperation

Water Unesco, World Water Assessment Programme (United Nations), 2006 This illustrated report sets out a global review of the state of the world's freshwater resources based on the collective work of 24 United Nations agencies following on from the conclusions of the first UN World Water Development Report *Water for People Water for Life* published in 2003 ISBN 9231038818 This second edition discusses progress towards the water related targets of the UN Millennium Development Goals and examines a range of key issues including population growth and increasing urbanisation changing ecosystems food production health industry and energy as well as risk management valuing and paying for water and increasing knowledge and capacity It contains 16 case studies which consider key challenges in water resource management and makes a number of recommendations to guide future action and encourage sustainable use productivity and management of our increasingly scarce freshwater resources

The United Nations World Water Development Report UNESCO World Water Assessment Programme, 2022-03-02 Accounting for approximately 99% of all liquid freshwater on Earth groundwater has the potential to provide societies with tremendous social economic and environmental benefits and opportunities However this natural resource is often poorly understood and consequently undervalued mismanaged and even abused In spite of its overall abundance groundwater remains vulnerable to over exploitation and pollution both of which can have devastating effects on the resource and its availability In the context

of growing water scarcity across many parts of the world the enormous potential of groundwater and the need to manage it sustainably can no longer be overlooked The 2022 edition of The United Nations World Water Development Report describes the challenges and opportunities associated with the development management and governance of groundwater across the world
