The first is the end of the Holocene and the start of the Anthropocene, which was marked by the test of a nuclear bomb on 16 July 1945. In the prevailing peace and security narrative, nuclear weapons and the other country bloc or alliance pose a perceived threat to humankind's survival. In

the Anthropocene narrative we are the threat through our way of life and the burning of fossil fuels The start of the Anthropocene coincides with a change in the international order with the setting up of the UN and the Bretton Woods Institutions Three stages of this order are distinguished the Cold War bipolarity the post Cold War era unipolarity and the end of the rule based global liberal order multipolarity on 24 February 2022 In this book ten multidisciplinary perspectives discuss complexity Anthropocene geopolitics peace and security discourses and the debate on the Anthropocene planetary boundaries complex crises and integrative geography in the Anthropocene governance and politics and the Patriacene and gender Both existential threats for humankind are illustrated by cover photos of the first nuclear weapons test on 16 July 1945 and by Category 5 Hurricane Otis an extreme weather event impacting on Acapulco in Mexico on 25 October 2023 The Anthropocene as a new epoch of Earth history coincides in 1945 with a change in the international order In the security and peace narrative the other and nuclear weapons pose an existential threat in the Anthropocene narrative This dual existential change requires a rethinking of politics policy and polity In the social sciences the Anthropocene is being discussed from multidisciplinary perspectives geography political science and peace security and gender studies This is an open access publication

The cultural politics of contemporary Hollywood film Chris Beasley, Heather Brook, 2019-01-21 Adopting and developing a cultural politics approach this comprehensive study explores how Hollywood movies generate and reflect political myths about social

and personal life that profoundly influence how we understand power relations. Instead of looking at genre, it employs three broad categories of film. Security films present ideas concerning public order and disorder, citizen-state relations, and the politics of fear. Relationalities films highlight personal and intimate politics, bringing norms about identities, gender, and sexuality into focus. In socially critical films, particular issues and ideas are endowed with more overtly political significance. The book considers these categories as global political technologies implicated in hegemonic and soft power relations whose reach is both deep and broad.

The Routledge Handbook of the Politics of Brexit Patrick Diamond, Peter Nedergaard, Ben Rosamond, 2018-05-08. The surprise decision expressed by the British people in the referendum held in June 2016 to leave the European Union was remarkable. It also presents a natural experiment where the exposure of a society to an extraordinary event allows scholars to observe in real time in the real world the interaction of variables. The Routledge Handbook of the Politics of Brexit takes stock of what we know in the social science community about the Brexit phenomenon so far and looks to make sense of this remarkable process as it unfolds. The book asks simple questions across a range of areas and topics so as to frame the debate into a number of navigable subdiscussions, providing structure and form to what is an evolving and potentially inchoate topic. As such, it provides a systematic account of the background for the content of and the possible implications of Brexit. The handbook therefore does not examine in detail the minutiae of Brexit as it unfolds on a day-to-day basis but raises its sights to consider both the broad contextual factors that shape and are shaped by Brexit and the deeper sources and implications of the British exit from the European Union. Importantly, as interest in Brexit reaches far beyond the shores of the United Kingdom, so an international team of contributors examines and reveals the global implications and the external face of Brexit. The Routledge Handbook of the Politics of Brexit will be essential reading and an authoritative reference for scholars, students, researchers, and practitioners involved in and actively concerned about research on Brexit, British politics, European Union politics, and comparative politics and international relations.

Cyber Security Politics Myriam Dunn Cavelty, Andreas Wenger, 2022-02-15. This book examines new and challenging political aspects of cyber security and presents it as an issue defined by socio-technological uncertainty and political fragmentation. Structured along two broad themes and providing empirical examples for how socio-technical changes and political responses interact, the first part of the book looks at the current use of cyber space in conflictual settings, while the second focuses on political responses by state and non-state actors in an environment defined by uncertainties. Within this, it highlights four key debates that encapsulate the complexities and paradoxes of cyber security politics from a Western perspective: how much political influence states can achieve via cyber operations; and what context factors condition the limited strategic utility of such operations; the role of emerging digital technologies; and how the dynamics of the tech innovation process reinforce the fragmentation of the governance space; how states attempt to uphold stability in cyberspace; and more generally in their strategic relations; and how the shared responsibility of state, economy, and society for cyber security continues to be re-

negotiated in an increasingly trans sectoral and transnational governance space This book will be of much interest to students of cyber security global governance technology studies and international relations The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license [Principles Of International Politics: People's Power, Preferences, and Perceptions, 3rd Edition](#) Bruce Bueno De Mesquita, 2006 Leaders want to stay in power Their self interest is the decisive motivation for action in the international arena and forms the theoretical backbone for this exciting departure from other introductory international relations texts Through its discussion and development of the strategic perspective Principles of International Politics shows students how leaders translate their personal interests and ambitions into actions of the state and convincingly demonstrates how international and domestic politics are inextricably linked Clearly explaining both the foundational ideas of international relations as well as the key concepts of the strategic perspective Bueno de Mesquita effectively links these to the analytic tools students will employ throughout **The Indonesian Quarterly**, 2007 *The Living World Basic Concepts* George Johnson, 2005-04-01 **Expressions of Islam in Recent Southeast Asia's Politics** Mitsuo Nakamura, 2010 **Key Concepts in Political Communication** Darren G Lilleker, 2006-01-25 This is a systematic and accessible introduction to the critical concepts structures and professional practices of political communication Lilleker presents over 50 core concepts in political communication which cement together various strands of theory From aestheticisation to virtual politics he explains illustrates and provides selected further reading He considers both practical and theoretical issues central to political communication and offers a critical assessment of recent developments in political communication *Australian Defence Force Journal*, 2002 *Symposium*, 2008 **Federal Poverty Reduction Plan** Canada.
