

I. Objectives

In this laboratory, you will be introduced the basic functions involved in creating a circuit, in simulating and in testing an analog circuit.

II. Prelab

Read following document carefully. However, you do not have to submit prelab report.

III. Multisim Electronics Workbench

1. Introduction

Figure 1 shows the opening screen of Workbench. To use the program you choose a set of components from the Parts Bin toolbar located on the left side of the screen and place them on the screen. The components are connected by using the cursor to drag "wires" between the parts. When the circuit is complete, you choose some type of measuring instrument from the Instruments toolbar on the right side of the screen. For example, you might connect an oscilloscope to the output of your circuit. This done, you can simulate your circuit and observe the output on the instruments you connected.

Figure 1 - The Multisim opening screen

Figure 2 lists the commonly used icons from the toolbars.
