Society Nicole Aschoff, 2020-03-10 Addresses how tech empowers community organizing and protest movements to combat the systems of capitalism and data exploitation that helped drive tech's own rise to ubiquity Our smartphones have brought digital technology into the most intimate spheres of life It's time to take control of them repurposing them as pathways to a democratically designed and maintained digital commons that prioritizes people over profit Smartphones have appeared everywhere seemingly overnight since the first iPhone was released in 2007 the number of smartphone users has skyrocketed to over two billion Smartphones have allowed users to connect worldwide in a way that was previously impossible created communities across continents and provided platforms for global justice movements However the rise of smartphones has led to corporations using consumers' personal data for profit unmonitored surveillance and digital monopolies like Google Facebook and Amazon that have garnered control over our social political and economic landscapes But people are using their smartphones to fight back New modes of resistance are emerging signaling the possibility that our pocket computers could be harnessed for the benefit of people not profit From helping to organize protests against the US Mexico border wall through Twitter to being used to report police brutality through Facebook Live smartphones open a door for collective change

Medieval Saints and Modern Screens Alicia Spencer-Hall, 2025-10-01 This ground breaking book brings theoretical perspectives from twenty first century media film and cultural studies to medieval hagiography *Medieval Saints and Modern Screens* stakes the claim for a provocative new methodological intervention consideration of hagiography as media More precisely hagiography is most productively understood as cinematic media Medieval mystical episodes are made intelligible to modern audiences through reference to the filmic the language form and lived experience of cinema Similarly reference to the realm of the mystical affords a means to express the disconcerting physical and emotional effects of watching cinema Moreover cinematic spectatorship affords at times a more or less secular experience of visionary transcendence an agapeic encounter The medieval saint's visions of God are but one pole of a spectrum of visual experience which extends into our present multi media moment We too conjure godly visions on our smartphones on the silver screen and on our TVs and laptops This book places contemporary pop culture media such as blockbuster movie *The Dark Knight* Kim Kardashian West's social media feeds and the outputs of online role players in *Second Life* in dialogue with a corpus of thirteenth century Latin biographies *Holy Women of Liège* In these texts holy women see God and see God often Their experiences fundamentally orient their life and offer the women new routes to knowledge agency and belonging For the holy visionaries of *Liège* as with us modern seers visions are physically intimate ideologically overloaded spaces Through theoretically informed close readings *Medieval Saints and Modern Screens* reveals the interconnection of decidedly old media medieval textualities and artefacts of our new media ecology which all serve as spaces in which altogether human concerns are brought before the contemporary culture's eyes

Self-Representation in an Expanded Field Ace Lehner, 2021-05-31 Defined as a self image made with a hand held mobile device and shared via social media platforms the selfie has facilitated self imaging becoming a ubiquitous part of globally networked contemporary life Beyond this selfies have facilitated a diversity of image making practices and enabled otherwise representationally marginalized constituencies to insert self representations into visual culture In the Western European and North American art historical context self portraiture has been somewhat rigidly albeit obliquely defined and selfies have facilitated a shift regarding who literally holds the power to self image Like self portraits not all selfies are inherently aesthetically or conceptually rigorous or avant guard But as this project aims to do address via a variety of interdisciplinary approaches selfies have irreversibly impacted visual culture contemporary art and portraiture in particular Selfies propose new modes of

self imaging forward emerging aesthetics and challenge established methods they prove that as scholars and image makers it is necessary to adapt and innovate in order to contend with the most current form of self representation to date The essays gathered herein will reveal that in our current moment it is necessary and advantageous to consider the merits and interventions of selfies and self portraiture in an expanded field of self representations We invite authors to take interdisciplinary global perspectives to investigate various sub genres aesthetic practices and lineages in which selfies intervene to enrich the discourse on self representation in the expanded field today
