Increasing Student Engagement and Retention Using Multimedia Technologies Laura A. Wankel, Patrick Blessinger, 2013-03-25 Multimedia and video related technologies are reshaping and reframing the practice of teaching and learning in higher education This volume critically examines new research on how multimedia technologies are being used in higher education to increase learner engagement and collaboration in and out of the classroom

Multiliteracy Play Chantelle Warner, 2024-03-07 This book proposes to expand multiliteracies frameworks in second language education by recognizing that learning a new language and culture involves both designs and desires the affects and emotions that feed our responses to particular ways of making meaning Over the past two decades multiliteracies approaches to second language education have brought attention to the diversity of modes media language varieties and discourses involved in what we often shorthand as language learning A core concept in these discussions is the idea of meaning design the idea that languages are dynamic culturally shaped systems of resources for engaging with and making sense of the world Building on these discussions and drawing inspiration and practical examples from a variety of modern language classes in higher education in the USA the book demonstrates how poetic and playful language can be embedded in multiliteracies pedagogy in ways that foster learners and teachers awareness of designs while also making space for desires that are harder to script or plan for In addition to building a conceptual map around poetics and play for researchers and teachers in language education the book offers concrete examples of what a multiliteracies approach emphasizing designs and desires can look like in classrooms and curricula

Biotransformations in Organic Chemistry Kurt Faber, 2012-12-06

The use of natural catalysts enzymes for the transformation of non natural man made organic compounds is not at all new they have been used for more than one hundred years employed either as whole cells cell organelles or isolated enzymes 1 2 Certainly the object of most of the early research was totally different from that of the present day Thus the elucidation of biochemical pathways and enzyme mechanisms was the main reason for research some decades ago It was mainly during the 1980s that the enormous potential of applying natural catalysts to transform non natural organic compounds was recognized What started as a trend in the late 1970s could almost be called a fashion in synthetic organic chemistry in the 1990s Although the early euphoria during the gold rush in this field seems to have eased somewhat there is still no limit to be seen for the future development of such methods As a result of this extensive recent research there have been an estimated 12000 papers published on the subject To collate these data as a kind of super review would clearly be an impossible task and furthermore such a hypothetical book would be unpalatable for the non expert 3 6

Byzantium and the Avars, 6th-9th Century AD Georgios Kardaras, 2018-10-22

In this book Georgios Kardaras offers a global view of the contacts between the Byzantine Empire and the Avar Khaganate

emphasizing the reconstruction of these contacts after 626 when in contrast to archaeological evidence written sources are very few and the definition of the possible channels of communication between the two powers The author scrutinizes the political and diplomatic framework and critically examines issues such as mutual influence on material culture and on warfare reaching the conclusion that significant contact between Byzantium and the Avars can be proved up until 775

The Avars Walter Pohl, 2018-12-15 Though the book was first published in German in 1988 this English version includes many revisions and updates and will be the definitive English language study of the Avar empire for years to come It will be invaluable for those interested in medieval history or in the impact of nomadic steppe empires on sedentary civilizations Choice The Avars arrived in Europe from the Central Asian steppes in the mid sixth century CE and dominated much of Central and Eastern Europe for almost 250 years Fierce warriors and canny power brokers the Avars were more influential and durable than Attila's Huns yet have remained hidden in history Walter Pohl's epic narrative translated into English for the first time restores them to their rightful place in the story of early medieval Europe The Avars offers a comprehensive overview of their history tracing the Avars from the construction of their steppe empire in the center of Europe their wars and alliances with the Byzantines Slavs Lombards and others their apex as the first so called barbarian power to besiege Constantinople in 626 to their fall under the Frankish armies of Charlemagne and subsequent disappearance as a distinct cultural group Pohl uncovers the secrets of their society synthesizing the rich archaeological record recovered from more than 60 000 graves of the period as well as accounts of the Avars by Byzantine and other chroniclers In recovering the story of the fascinating encounter between Eurasian nomads who established an empire in the heart of Europe and the post Roman Christian cultures of Europe this book provides a new perspective on the origins of medieval Europe itself **Analytical**

Congress Association [English Edition] International Railway Congress Association, 1913 Everyday Christian Teaching David I. Smith, 2025-02-20 Discover how ordinary moments in the school year can become occasions for making profound connections between faith and pedagogy In this encouraging and practical book education expert David I Smith invites Christian educators on a journey through the school year that will deepen their capacity to make thoughtful connections between their faith and their pedagogy Mirroring the rhythms of an academic year the book embraces and explores the mundane moments that all teachers experience every semester Starting the course Setting some norms for

interaction Choosing how to frame the material Assigning tasks Repeating things Pausing Bringing things to a close The topics are deliberately ordinary because as Smith demonstrates the shape of one's teaching is mainly built from the unspectacular choices and actions that gradually shape the texture of life in the classroom If educators want to think well about Christian faith and teaching and act well in the classroom they need to learn to reflect well on those ordinary steps in the journey Everyday Christian Teaching builds on Smith's previous book On Christian Teaching Practicing Faith in the Classroom where he made a persuasive case for connecting faith and pedagogy The new book aims to put this idea into practice as Smith explains in the introduction Suppose we want to get better at thinking about faith and teaching together What then What does the road look like and how do we walk it wisely If we'd like to be a pilgrim how do we make progress Taking up such questions with wisdom and empathy Everyday Christian Teaching helps educators develop faith informed insights and life giving practices that can transform their teaching over the course of time
