Newson, 1997 This text presents an overview of fluvial geomorphology how water movement effects the surface features of the Earth and aims to provide river engineers and managers with an understanding of natural channel forms and fluvial processes Water, Ice and Wind Brian Peter Fluvial Erosion and Deposition G. Pickup, 1982 The sediment production zone is an area of erosion The rate Price.1976 of erosion depends on geological structure soil conditions vegetation and the amount of runoff which occurs The sediment transfer zone may experience alternating erosion and deposition but a balance between the two frequently exists so that sediment input and output are matched Both zones are sensitive to changes in controlling factors such as climate sediment input or local base level and it is possible to trigger a wave of erosion or deposition which passes through the system Development activities may also cause instability and change the behaviour of the drainage basin Author's abstract
