OECD Reviews on Local Job Creation

Preparing for the Future of Work in Canada OECD,2020-07-23 COVID 19 has led to a labour market shock in Canada and is likely to generate a profound reflection on production and consumption habits COVID 19 is also likely to accelerate automation as firms look to new technologies to pandemic proof their operations *The Future of Work* Darrell M. West,2018-05-15 Robots artificial intelligence and driverless cars are no longer things of the distant future They are with us today and will become increasingly common in coming years along with virtual reality and digital personal assistants As these tools advance deeper into everyday use they raise the question how will they transform society the economy and politics If companies need fewer workers due to automation and robotics what happens to those who once held those jobs and don t have the skills for new jobs And since many social benefits are delivered through jobs how are people outside the workforce for a lengthy period of time going to earn a living and get health care and social benefits Looking past today s headlines political scientist and cultural observer Darrell M West argues that society needs to rethink the concept of jobs reconfigure the social contract move toward a system of lifetime learning and develop a new kind of politics that can deal with economic dislocations With the U S governance system in shambles because of political polarization and hyper partisanship dealing creatively with the transition to a fully digital economy will vex political leaders and complicate the adoption of remedies that could ease the transition pain It is imperative that we make major adjustments in how we think about work and the social contract in order to prevent society from spiraling out of control This book presents a number of proposals to help people deal with the transition from an industrial to a digital economy We must broaden the concept of employment to include volunteering and parenting and pay greater attention to the opportunities for leisure time New forms of identity will be possible when the job no longer defines people s sense of personal meaning and they engage in a broader range of activities Workers will need help throughout their lifetimes to acquire new skills and develop new job capabilities Political reforms will be necessary to reduce polarization and restore civility so there can be open and healthy debate about where responsibility lies for economic well being This book is an important contribution to a discussion about tomorrow one that needs to take place today *Pivot to the Future* Omar Abbosh,Paul Nunes,Larry Downes,2019-04-23 The proven effective strategy for reinventing your business in the age of ever present disruption Disruption by digital technologies That s not a new story But what is new is the wise pivot a replicable strategy for harnessing disruption to survive grow and be relevant to the future It s a strategy for perpetual reinvention across the old now and new elements of any business Rapid recent advances in technology are forcing leaders in every business to rethink long held beliefs about how to adapt to emerging technologies and new markets What has become abundantly clear in the digital age conventional wisdom about business transformation no longer works if it ever did Based on Accenture s own experience of reinventing itself in the face of disruption the company s real world client work and a rigorous two year study of thousands of businesses across 30 industries Pivot to the Future reveals methodical and bold moves for finding and releasing new sources of trapped value

unlocked by bridging the gap between what is technologically possible and how technologies are being used The freed value enables companies to simultaneously reinvent their legacy and current and new businesses Pivot to the Future is for leaders who seek to turn the existential threats of today and tomorrow into sustainable growth with the courage to understand that a wise pivot strategy is not a one time event but a commitment to a future of perpetual reinvention where one pivot is followed by the next and the next

EDUCAUSE Review ,2001 *World Employment Report* ,1998 **World Employment Report, 1998-99** International Labour Office,1998 The pace of globalization and technological change provides both challenges and opportunities at a time when the global employment situation remains grim and levels of open unemployment and underemployment remain high in most countries This text reviews the global employment situation and examines how countries in different circumstances and stages of development can develop the best training strategy and flexible and responsive training systems to address these far reaching changes The report presents a close analysis of training systems worldwide and an examination of training strategies for increasing national competitiveness improving the efficiency of enterprises and promoting women s employment opportunities and enhancing the skills and employability of informal sector The report suggests specific policy reforms for making training more efficient and effective Given the rapid and continuous pace of change in the demand for new skills the report concludes that training and lifelong learning need to be given the highest priority

World Employment International Labour Office,1995 The impact of globalization of the world economy on employment throughout the world was examined by determining the causes and effects of the reduction in economic growth that has occurred in most developed and developing countries since 1973 The following were among the factors considered international inequality new technologies effects of globalization on labor demand and labor standards and policy

responses to globalization trade and industrialization foreign direct investment adjustment measures labor market regulation The effects of reduced economic growth on a given country s employment patterns levels were found to depend on that country s way of responding to inadequate growth The view that labor market rigidity is the main cause of poor employment performance was refuted It was concluded that although globalization generates real employment problems unemployment declining relative wages and reduced job prospects its potential benefits far outweigh its costs The optimal strategy for encouraging economic development in a global economy was said to be to reap the considerable gains of continued globalization in terms of higher output and efficiency while developing appropriate national and international policies to deal with the social problems engendered by globalization Contains 42 tables figures and 216 endnotes MN Vocational Education and Training ,1998 Recoge 1 Introduction 2 The problem of organising occupational transition 3 Vocational training system and organisation of transition 4 The organisation of transition in the comparisons *The NABW Journal* ,1983
