Introduction

The case of Uber, the project that has changed the way taxi passengers are transported by, describes how the impact of an innovative approach to organizing a business can change market views on specific goods or services. The introduction of an updated system of interaction between drivers and customers has become a new round in the development of urban transport.

Main body

One of the main drivers of this success for Uber and the globalization of this brand is that in many countries, road transport is not within the scope of federal jurisdiction. This means that owners of such services as Uber can set their individual regulations and take into account the needs of the market in order to offer consumers an innovative project. As a result, the lack of control and stringent restrictions at the highest level leads to the reorganization of market trends and the emergence of new approaches to traditional businesses.

Different carrier companies began to introduce applications and other digital tools for interacting with customers, which indicates a new trend proposed by Uber. In Figure 1, the key outcomes of such a market intervention are presented, which reflect the changes in the whole system of taxi driving.

Disruptive Change In The Taxi Business The Case Of Uber:

Disruptive Change in the Taxi Business ,2016 In most cities the taxi industry is highly regulated and utilizes technology developed in the 1940s Ride sharing services such as Uber and Lyft which use modern internet based mobile technology to connect passengers and drivers have begun to compete with traditional taxis This paper examines the efficiency of ride sharing services vis vis taxis by comparing the capacity utilization rate of UberX drivers with that of traditional taxi drivers in five cities The capacity utilization rate is measured by the fraction of time a driver has a fare paying passenger in the car while he or she is working and by the share of total miles that drivers log in which a passenger is in their car The main conclusion is that in most cities with data available UberX drivers spend a significantly higher fraction of their time and drive a substantially higher share of miles with a passenger in their car than do taxi drivers Four factors likely contribute to the higher capacity utilization rate of UberX drivers 1 Uber s more efficient driver passenger matching technology 2 the larger scale of Uber than taxi companies 3 inefficient taxi regulations and 4 Uber s flexible labor supply model and surge pricing more closely match supply with demand throughout the day Case Studies on the Regulatory Challenges Raised by Innovation and the Regulatory Responses OECD,Korea Development Institute,2021-12-14 The pace and scope of innovation are challenging the way governments regulate Existing regulatory frameworks might not be agile enough to accommodate the fast pace of technological development and as a consequence rules might become outdated

Disruptive Innovation and Sunset Clauses Antonios E. Kouroutakis, 2019 Uber and other on demand transportation network companies such as Lyft and Cabify have brought significant change in the transportation industry within cities Calling a taxi was never so simple and easy while the payment transaction was never so fast and convenient However such ride sharing platforms brought significant disruption within the taxi business Nowadays ride sharing platforms

operate in the vast majorities of the big cities in some cities like New York cars affiliated with on demand ridesharing platforms have not only outnumbered taxis but also and more importantly have taken away millions of rides from taxi drivers Due to the noticeable drop in passengers the value of taxi licences has drastically reduced According to anecdotal references in 2013 a taxi licence in New York was worth as much as 1 3 million however nowadays the price has dropped down to as low as 200 000 As a result such disruption in the taxi business has brought protests from taxi drivers around the world and has created challenges to policy makers on how to resolve the conflicting interests and resolve the tension Such challenges are expected to rise with the spread of the autonomous cars in the future This chapter aims to examine the utility of sunset clauses in order to resolve this issue It will use the progressive abolition of roaming charges as a pilot case which took place with a number of laws subject to sunset clauses in order to show how such clauses may with temporary regulations to deregulate the taxi industry by creating a predictable business environment for all parties involved Creative Destruction and the Sharing Economy Henrique Schneider,2017-01-27 While creative destruction and disruptive innovation change the entrepreneurial landscape regulation especially regulation of sectorial markets and competition regulation can delay this change or even bring it to a halt Uber plays an active role between these two forces first as an agent of creative destruction and then possibly in championing regulation on its own terms Grounded in a particular understanding of the economic concept of the market as a series of processes this book explores the implications of creative destruction competition regulation and the role that businesses play Instead of discussing these relations in a purely abstract manner this book uses Uber as a case study **The Uber Case** Sanya Ojo,2017 This case written from the perspective of a student part time Uber driver offers insight into the business model and associated practices and processes of Uber Like other technology start ups Uber operates a successful business based on the on demand flexible employment model However the tide is turning as drivers who are regarded as partners or contractors are taking legal actions demanding reclassification and compensation for past misclassification An assessment of Ubers legal difficulties surrounding its business relationships with its drivers offers insight into this business model Uber as a company and the broader business environment in which they operate Four options are contemplated as a way forward for Uber to avoid possibly debilitating outcomes *Global Perspectives on Legal Challenges Posed by Ridesharing Companies* Zeynep Ayata,Işık Önay,2020-09-28 This book examines how regulators and policymakers from nine different countries have dealt with Uber and initiates a legal dialogue between different jurisdictions that could potentially pave the way to a harmonized approach in regulating Uber The case studies conducted in Brazil Germany Italy Mexico Spain South Africa Turkey the UK and the US reveal the case law and regulatory responses that have been adopted in various areas of law Legal issues relevant to Uber include market regulation labor law civil liability consumer protection unfair competition and antitrust law The book thus compares and contrasts the regulatory policy implications of the disruptive innovation created by Uber in the area of transport services The book starts with a conceptual

overview of the legal challenges posed by Uber and concludes with comparative findings based on the individual case studies In addition to introducing academics and legal practitioners to the theoretical and practical legal problems they may encounter in connection with Uber the book will especially appeal to policymakers who can benefit from and compare the experiences of other jurisdictions

Disruptive Innovation The New York Times Editorial Staff,2018-07-15 In 1995 the term disruptive innovation was coined to describe innovations that disrupt and threaten existing markets and consumer habits Since then we've played witness to how new companies have altered and threatened key industries such as hospitality and the taxi industry These articles explore the growth of two of the most prominent disruptive tech companies Uber and Airbnb and how competitors and regulators have responded to the changing tides Uber's Disruption of the Taxi Industry in Australia Caroline Mutuku,2018-07-11 Essay from the year 2018 in the subject Business economics Investment and Finance grade 1 5 language English abstract Uber has disrupted the Australian Taxi industry by dominating the market because it is easy to access and it is also cheap compared to other transport services such as the taxis This ride sharing business is well funded by the entrants hence challenging the taxi industry The taxi drivers are concerned that Uber are not regulated not bound by the same taxi regulatory structures implying that they are able to compete in uneven playing field thus getting a competitive advantage over the taxi drivers The taxi drivers argue that Uber drivers escape the regulatory costs hence making them illegal or unfair in the taxi industry As a result this ride sharing business is disrupting the taxi industry according to most of the incumbents in these industries **Uber and the Taxi Industry** Dimitri Dadiomov,2015

Uber—Brave New Service or Unfair Competition Jasenko Marin,Siniša Petrović,Mišo Mudrić,Hrvoje Lisičar,2019-10-19 This book analyzes the legal issues connected with the provision of Uber related services It primarily focuses on the various contractual and non contractual relationships that occur during the use of Uber applications especially with reference to Uber headquarters Uber App Uber branch offices advertisements Uber partner drivers employees or self employed Uber application registered users Uber transportation service users contracting passenger and third party Uber transportation service users additional passenger It also provides a comparison of standard transportation services and contracts of carriage irrespective of whether the carrier in question is a common carrier contractual carrier actual carrier or an intermediary service provider Furthermore the book presents the relevant case law especially with regard to Uber as a taxi service Uber as a share riding service Uber as a rent a car with driver service Uber as an employer and Uber as a key organizer of transportation service in Croatia Belgium Germany Italy the Netherlands United Kingdom United States Hungary Argentina and France Lastly it explores the different legislative approaches to resolving various issues related to the appearance of Uber and similar companies the Laissez faire model Status Quo model Legal Adjustment model and the New Legislative Paradigm model Disruptive Technologies and Local Governments Sivan Naaman,2016 **Uber versus taxi. Generation Y's perception of taxi and Uber services in Lisbon** Benyi Heider,Carla Sofia Simões,Ivana

Cizmar, Marvin Burmester, 2016-05-02 Seminar paper from the year 2016 in the subject Economics Case Scenarios grade 17
0 1 3 in Deutschland Cat lica Lisbon School of Business Economics language English abstract This report investigates the effects and influence of Uber's market entry in the greater Lisbon area. More specifically, the study evaluates the resulting impact on Generation Y's perception of traditional taxi services. Based on the findings of the research, the report suggests concrete managerial implications to the traditional taxi industry. The overall research was designed to derive insights based on both qualitative and quantitative approaches. The qualitative research was performed with two focus groups and created the foundation for the quantitative research, which was executed using an extensive online questionnaire with 94 participants. Both approaches targeted respondents classified as Generation Y. Core findings include the most significant attributes to evaluate traditional taxi services. Most importantly, the price, the friendliness of the driver, and security were highlighted. Moreover, the overall satisfaction of customers is further determined by attributes such as availability, comfort, and payment process. It must be considered, however, that taxi services are rated significantly different among Uber users and non-Uber users. As the former have ranked taxi services significantly worse than non-Uber users, it can be concluded that the recent market entry of Uber influences and changes Generation Y's perception of traditional taxis. The complementing finding that Uber services have been evaluated significantly more positive among all respondents impressively emphasizes the threat for traditional taxis in the greater Lisbon area. The emerging competitor Uber is perceived as superior even among the non-Uber users. Both the qualitative and quantitative analysis revealed that the traditional taxi industry currently faces major problems related to the lack of trust, transparency, and security of the services, as well as the limited options of payment methods. For the time being, this leaves the services' availability as the only competitive advantage of the traditional taxi industry. In order to secure its competitiveness in any market scenario, it can be concluded that the industry needs to adapt its core services with regards to multiple service features. With a focus on Generation Y, the taxi industry must introduce tools and mechanisms to enhance and control transparency, foster the acceptance of credit cards as a payment method, and ultimately drop prices to a perceived fair and competitive level.

Uber Henrique Schneider, 2017-02-09 This book employs a variety of economic and philosophical methodologies in order to discover the philosophical implications of creative destruction, competition regulation, and the role that businesses or market agents play. Instead of discussing these relations in a purely abstract manner, Schneider uses Uber to illuminate important matters in economic and philosophical thought. Schneider tells the following story: While creative destruction and disruptive innovation change the entrepreneurial landscape, regulation, especially the regulation of sectorial markets and competition regulation, delay this change or even bring it to a halt. Uber, as an agent in the market, is not just an object moved by these two opposing forces. Rather, it plays an active role: first as an agent of creative destruction and then in championing regulations on its own terms.
