Institutional Design and Capacity to Enhance Effective Governance of Oil and Gas Wealth: The Case of Kurdistan Region Khazal Abdullah Auzer, 2017-05-15 This book presents a critical reappraisal of the resource curse thesis and extends the analysis to consider political and social dimensions and thus the importance of structure in the petroleum sector's governance model. It examines major challenges surrounding the governance of petroleum resources and the implications for the economic growth and development of hydrocarbon abundant countries as a result of ineffective economic, political, and social mechanisms. The book subsequently investigates a range of causal factors that may promote or hinder the effective management of oil and gas resources in the Kurdistan Region, which also has implications for the security of the wider region and for global energy security. The book also seeks to arrive at lessons learned and policy guidelines to help inform other new petroleum exporting countries and regions about how to best manage their newfound wealth.

Research Anthology on Macroeconomics and the Achievement of Global Stability Management Association, Information Resources, 2022-08-05 The COVID 19 pandemic has shocked economies around the world and created an era of global instability. As the pandemic comes to a close, it is essential to examine global economies in order to achieve and maintain global stability. By maintaining global stability, the world may be prepared for future economic shocks. The Research Anthology on Macroeconomics and the Achievement of Global Stability discusses the emerging opportunities, challenges, and strategies within the field of macroeconomics. It features advancements in the field that encourage global economic stability. Covering topics such as Islamic banking, international trade, and Econophysics, this major reference work is an ideal resource for economists, government leaders and officials, business leaders and executives, finance professionals, students, and educators of higher education, librarians, researchers, and academicians.

Handbook of BRICS and Emerging Economies P. B. Anand, Shailaja Fennell, Flavio Comim, 2021 Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001, there have been many different assessments of these major emerging economies, with some even proclaiming that the promise of the BRICS comprising Brazil, Russia, India, China, and South Africa is over. However, the so-called arranged marriage still seems to be working well, with the club having become a formal international forum with summit declarations, ministerial meetings, and numerous BRICS-wide fora. Is this euphoria misplaced? Is there a BRICS model of economic and human development? Are inequalities increasing, and is this the denouncement of the economic successes? The Handbook of BRICS and Emerging Economies presents a comprehensive and multi-faceted analysis of the BRICS countries and other emerging economies, exploring their economic, social, environmental, and governance dimensions and other challenges. It brings together multi-disciplinary perspectives from more than fifty authors to examine how education contributed to the emergence of BRICS, how BRICS are impacting African economies, and how other emerging economies including Chile, Mexico, Turkey, and others in Africa and Central Asia compare. It observes the impact of governance challenges both within individual countries

and in the forum for co operation amongst them what issues related to gender and identity based violence are prevalent and what the security implications are and the role of BRICS is in contributing to peace keeping operations

Diversified Development Indermit S. Gill, Ivailo Izvorski, Willem van Eeghen, Donato De Rosa, 2014-02-26 Eurasian economies have to become efficient more productive job creating and stable But efficiency is not the same as diversification Governments need to worry less about the composition of exports and production and more about asset portfolios natural resources built capital and economic institutions

Handbook of Sustainable Politics and Economics of Natural Resources Tsani, Stella, Overland, Indra, 2021-12-10 This timely Handbook draws together insightful analyses of natural resource management challenges and solutions in the face of sustainable development targets and a changing global climate

Economic Diversification Policies in Natural Resource Rich Economies Sami Mahroum, Yasser Al-Saleh, 2016-08-05 Economic diversification remains at the top of the agenda for hundreds of regions around the world From the single commodity economies of African countries and the Caribbean to the many single industry regions of Europe and North America as well as the oil and gas rich but volatile hydrocarbon economies Economic diversification policies have been around for almost a century with varying degrees of success and failure Economic Diversification Policies in Natural Resource Rich Economies takes a special interest in the policy experiences of a set of different countries that have extractive industries representing significant drivers of their economies and subsequently are significant contributors to government revenues It explores twelve cases including upper middle to high income economies such as Canada Australia Iceland and Norway emerging economies such as Latin America the GCC Saudi and UAE Kazakhstan Malaysia and Russia as well as the developing economy of Uganda Each chapter provides a review of economic diversification experiences including policy environment diversification strategies desired outcomes the role of government and a critical evaluation of achievements This book is suitable for those who study environmental economics development economics and resource management

What Drives Successful Economic Diversification in Resource-Rich Countries? Addisu Lashitew, 2020 The resource curse is often understood to imply poor growth in the non resource sectors of the economy but research into the diversification performance of resource rich countries is limited This paper surveys recent evidence and identifies empirical patterns in the economic diversification of resource rich countries Diversification is measured using the growth of per capita non resource manufacturing and services sectors in domestic and export markets which has a cleaner interpretation than competing measures This measure is used to evaluate the long term diversification of countries that started off as resource dependent and to rank countries according to their performance We then identify policy relevant correlates of diversification at the national level including the acquisition of human capital public and intellectual capital and firm dynamism More resource dependent countries appear to perform worse on measures of human capital and intellectual capital but more resource abundant countries perform better on public capital and human capital accumulation

We examine the mechanisms behind diversification performance through in depth case studies of Oman Laos and Indonesia and conclude by identifying policy lessons and future research directions
